QUESTION 1

A customer use case requires the second Factor Email during Oracle Identity Cloud Service Authentication process for a group of users only. The security administrator, signed in Oracle Identity Cloud Service console, enabled the email factor, edited the default sign-on policy and added a new sign-on rule. The new sign-on rule included the group name in the member of these groups conditions and prompt for additional factor every time. The administrator saved both the rule and the policy.

After executing this configuration, why does the email factor NOT appear to users from that group?

A. The default Sign-on Policy can\\'t be changed.

B. The security administrator needs to specify the list of users instead of the group name.

C. The Passcode Length and Validity Duration of the email factor don\\'t have a default value.

D. The security administrator didn\\'t change the order of the sign-on rules.

Correct Answer: C
