QUESTION 1

Which three options are true for the system.entityToResolve variable?

- A. System.entityToResolve can reference the resolve value of all entity values defined within the skill.
- B. The system.entityToResolve variable tracks an entity value, that is, as you resolve entities in the composite bag, it references the current entity resolved.
- C. \${system.entityToResolve.value.userinput} returns the text entered by the user.
- D. \${system.entityToResolve.value.resolvingField} returns the text entered by the user.
- E. The system.entityToResolve variable can be referenced from within the system. ResolveEntities and system.commonResponse components to display, for example, information about the entity that has been resolved.

Correct Answer: BCD

QUESTION 2

Which two statements about using the OAuth2 client credential grant type in Oracle Digital Assistant are correct?

- A. The OAuth2 client credential grant type does not require a bot user to authenticate and instead uses a shared clientId and secret.
- B. The user must be logged in to an identity service provider using his or her username and password to obtain a client credential access token
- C. You use the Oracle Digital Assistant Authentication Service with the system. OAuth2client component to obtain a client credential access token.
- D. The client credential grant type requires the system.OAuth2AccountLink component to obtain a token that propagates a user's identity between distributed systems.
- E. The OAuth2 client credential grant type uses the system. Webview built-in component to perform social media login.

Correct Answer: AC

QUESTION 3

You want your skill to output the size of the pizza that was ordered.. Which FreeMarker operation must you use

- A. "You ordered a \${size[0]} pizza." 3)
- B. "You ordered a \${size} pizza." :)
- C. "You ordered a \${size.value} pizza.
- D. "You ordered a \${size.string} pizza."

Correct Answer: A

QUESTION 4

Which two statements are true regarding local web application invocation using the system.webview component?

- A. Local webviews require a Node.js environment and must have a package, json file in their root folder.
- B. An SPA application can issue an Ajax post command to the callback URL that has been passed with the web application launch
- C. system.webview components can only be used with web channels.
- D. Local webviews require SPA applications to have an index.html file in their root folder.

Correct Answer: AD

QUESTION 5

Which three statements are true about composite bag entities?

- A. They define a business domain object as a collection of related system entities and custom entities.
- B. When you add entities to the composite bag, you can control how they get extracted in related to other entities and when they are prompted for.
- C. The composite bag will always enforce that every entity has a valid value before allowing the conversation to move on to the next state in the dialog flow.
- D. You need to create a separate composite bag to handle nonentity types such as strings. Locations, and attachments.
- E. The composite bag can resolve all entity values using only a single state in the dialog flow.

Correct Answer: BCE
