QUESTION 1

Which two statements describe Net Change Collection? (Choose two.)

- A. Data for the selected entities is replaced in the planning data repository.
- B. It completely refreshes the planning data repository.
- C. Data for the selected entities is deleted from the planning data repository.
- D. It collects only changed data to the planning data repository.
- E. It collects data only incrementally to the planning data repository.

Correct Answer: BE

QUESTION 2

Which three statements are true about the Extensible Flexfields setup for order capture integration? (Choose three.)

- A. The Extensible Flexfield implementation requires customers to manually map incoming Extensible Flexfield data to all Order Management entities.
- B. If the extensible attributes need to be passed to or received from downstream applications, the values must be passed in the payload structure.
- C. If the attribute information will be provided during the import process, the values should be provided in the import web service payload structure.
- D. The XLST "Copy-of" feature dynamically maps the input Extensible Flexfield to the Order Management entities and the Extensible Flexfield Order Management entity to the SDO/custom node for all Task Layers.
- E. The XLST "Copy-of" feature dynamically maps the input Extensible Flexfield to the Order Management entities and the Extensible Flexfield Order Management entity to the SDO/custom node only for the Decomposition (Sales Order Integration), Template Task Layer, and Fulfillment Task Layer.

Correct Answer: BCE

QUESTION 3

Your company wants to notify the external system when there is a high possibility that an order is going to be delayed.

Which four steps are required to invoke the external system connector to notify that an order is going to be delayed? (Choose four.)

- A. Set up the Jeopardy threshold for the orchestration process task.
- B. Set up the lead time for the orchestration steps in the orchestration process definition.

- C. Register the web service connector.
- D. Create a routing rule for the orchestration process task.
- E. Enable a business event trigger point for Jeopardy and associate the connector.
- F. Set up the Use Defined Lead time in the Available To Promise Rule.

Correct Answer: ABDE

QUESTION 4

The order manager in your company likes to monitor order delivery commitments in real time for customers.

Identify the Order Management Oracle Transactional Business Intelligence (OTBI) dashboard that can be used to get all possible root causes for orders that are not fulfilled on time.

- A. Fulfillment line in Jeopardy
- B. Orders on Backorder
- C. Orders on Past Due
- D. Orders in Jeopardy
- E. Orders on Hold

Correct Answer: C

Orders in jeopardy ?Details ?The Fulfillment Lines in Jeopardy Analysis shows the number of fulfillment lines that are in jeopardy, using a bar for each jeopardy priority that you have defined. For example, a range can indicate high, medium, or low jeopardy priorities. You can click a range bar to drill down to the Manage Fulfillment Lines page, which displays a list of fulfillment lines restricted to the exception type that corresponds to that range, as indicated by an icon in the Exception Type column. Orders on Past Due ?Details and allows filtering based upon : Year Inventory Organization Name Item Name Business Unit Name Bill-to Customer Name Ship-to Customer Name So Past due seems to give root cause details while Jeopardy gives ranges

QUESTION 5

Your company has a single global installation that contains Oracle Cloud Product Management, Oracle Cloud Trading Community Model, and Cloud Order Management. It has all the execution systems implemented in tandem with Global Order Promising. The Master data elements have also been migrated to their respective areas. The next step is to run the date collection program to load the planning data repository. Which five data elements will the collection program load into the planning data repository? (Choose five.)

- A. Currencies
- B. Shipping methods
- C. Suppliers

D. Customers

E. Items

F. Cross-referenced data

G. Calendars

Correct Answer: CDEFG
