QUESTION 1

Which three mandatory setups must be performed so that a purchase request is created for sales orders that will be fulfilled by a drop ship supplier? (Choose three.)

- A. Specify the preparer name in the Order Management parameters.
- B. Select the Customer Sales Order Fulfillment check box under the Procurement offering.
- C. Create a business rule in Supply Chain Orchestration.
- D. Define a sourcing rule of type Buy with a supplier and supplier site.
- E. Select the check box "Use Customer sales order" in the Group Requisitions section in the blanket purchase agreement.

Correct Answer: ABD

QUESTION 2

Your customer wants to include externally managed manufacturing supplies in Global Order Promising results. What are the four steps that you perform to meet this requirement?

- A. Ensure that the organizations in your external systems are modeled in Oracle SCM Cloud as item organizations.
- B. Enable each external system as a collection source by using the Manage Planning Source Systems page.
- C. In the Planning Central work area, select the Collect Planning Data task to complete the process of uploading your data.
- D. Load all of the data you require from your external system by using standard file uploads.
- E. In the Planning Central work area, select the "Load Planning Data from Flat Files" task to complete the process of uploading your data.

Correct Answer: B

QUESTION 3

You are in the process of setting up a constraint that prohibits update to an extensible flexfield in a fulfillment line if Ship From Warehouse is X and the fulfillment line is booked. You are able to see the extensible flexfield on the "Manage Constraint Entities" page but not on the "Manage Processing Constraints" page.

What could be the reason?

- A. The "generate packages" program was not submitted.
- B. The "Publish extensible flexfield" process was not run.

C. The extensible flexfield is not enabled.

D. A "Record Set" needs to be created for the extensible flexfield to be visible on the "Manage Processing Constraints" page.

Correct Answer: D

A record set is a group of records that are bound by common attribute values for the purpose of constraint evaluation. You can define conditions and specify a record set to be validated for a given condition as defined by the validation template.

QUESTION 4

Identify the transformation type in which a transactional item attribute is used for transforming a product. The transformation may be added to the existing product or replace the product on the sales order for a CTO item.

A. Attribute to Product

B. Product to Product

C. Context to Product

D. Attribute to Attribute

Correct Answer: A

An attribute-to-product transformation uses transactional attributes to transform an attribute to an item number. It can add the transformation to an existing item or replace the item that the source order references. Assume your company receives orders for an MP3 player that includes a Color attribute and a Size attribute, and that you must use a combination of these attributes to reference an item number. In the following example, a transformation rule transforms the Color and Size attributes of the Mini Plus item to the VIS481 item. Order Management displays VIS481 on the order line.

QUESTION 5

Your company is in the business of selling kitchen appliances.

Which three entities can you include while defining pricing rules that control how Oracle Pricing Cloud calculates the price for each time? (Choose three.)

A. Shipping change lists

B. Discount List

C. Pricing Profile

D. Pricing Strategy

E. Cost List

Correct Answer: ABE
