### QUESTION 1

Your company is implementing Order Management Cloud to manage the sales orders but fulfillment happens through third party logistics (3PL). What process should be executed to communicate to the 3PL system that the sales orders are ready to pick release and ship?

- A. Manage Shipments Interface
- B. Create Shipments
- C. Confirm Shipments
- D. Generate Shipments Request
- E. Send Shipments Advice

Correct Answer: D

### QUESTION 2

Which three attributes in the orchestration process definition utilize Oracle business rules to make runtime decisions for process behavior? (Choose three.)

- A. Cost of Change
- B. Exit Criteria
- C. Line Selection Criteria
- D. Start After conditions
- E. Evaluation Sequence

Correct Answer: BCD

### QUESTION 3

What is the configuration required to automatically calculate the Jeopardy Score and priority when an orchestration process is planned or re-planned?

- A. Schedule the process refresh and start the order promising server.
- B. Check the change mode parameter to Advanced on the orchestration process.
- C. Schedule the process plan orchestration processes.

D. Check the Replan Instantly parameter in the orchestration process.

Correct Answer: D

You can enable the Replan Instantly feature when you define an orchestration process. It replans the orchestration process immediately after this process completes the orchestration process step, and then displays the revised order data according to the replanning work that it does. It is recommended that you use Replan Instantly only for high priority sales orders, or with sales orders that include a jeopardy threshold of less than one day. For performance reasons, it is recommended that you do not use it with an orchestration process step that is long or complex. If Replan Instantly does not contain a check mark, then Order Management updates the planning data only during the scheduled replanning.

#### QUESTION 4

Which four order entities are global entities for which only one record for each instance of the entity is stored in the order orchestration and planning data repository? (Choose four.)

- A. Payment terms
- B. Unit of Measure
- C. Currency
- D. Warehouse
- E. Freight carriers

Correct Answer: ABCE

[https://docs.oracle.com/cd/E25054\\_01/fusionapps.1111/e20386/F499608AN2AEC9.htm](https://docs.oracle.com/cd/E25054_01/fusionapps.1111/e20386/F499608AN2AEC9.htm) The following entities are the global entities: Order orchestration reference objects Units of measure (UOM) and UOM conversions Demand classes Currency and currency conversion classes Shipping methods

#### QUESTION 5

Which three statements are true about the Extensible Flexfields setup for order capture integration? (Choose three.)

- A. The Extensible Flexfield implementation requires customers to manually map incoming Extensible Flexfield data to all Order Management entities.
- B. If the extensible attributes need to be passed to or received from downstream applications, the values must be passed in the payload structure.
- C. If the attribute information will be provided during the import process, the values should be provided in the import web service payload structure.
- D. The XLST "Copy-of" feature dynamically maps the input Extensible Flexfield to the Order Management entities and the Extensible Flexfield Order Management entity to the SDO/custom node for all Task Layers.
- E. The XLST "Copy-of" feature dynamically maps the input Extensible Flexfield to the Order Management entities and the Extensible Flexfield Order Management entity to the SDO/custom node only for the Decomposition (Sales Order

Integration), Template Task Layer, and Fulfillment Task Layer.

Correct Answer: BCE
