QUESTION 1

You are using the Check Availability feature to explore alternative ways of promising a batch of five fulfillment lines in simulation mode.

Which three attributes can you change to explore other promising options? (Choose three.)

- A. Requested Quantity
- B. Requested Ship-from warehouse
- C. Requested shipping method
- D. Allow substitute items
- E. Requested ship date
- F. Scheduled ship date

Correct Answer: BCD

The values for the attributes that begin with requested, such as the Requested Item attribute and the Requested Ship-from Warehouse attribute, are initially determined by what the values are when you select the line in the Order Orchestration work area. You cannot change the values for many of the requested attributes, such as the Requested Item attribute, the Requested Quantity attribute, and the Requested Ship Date attribute. You can change or clear the values for the Requested Ship-from Warehouse attribute and the Requested Shipping Method attribute. There are also some additional attributes you can change, such as whether substitutions are allowed, to influence the results when you explore other promising option.

QUESTION 2

The warehouse manager of your company wants manual intervention to handle the allocated materials and to backorder the sales order lines in case of any physical discrepancies in the stock before pick confirmation. The warehouse manager wants to enforce manual picking followed by auto ship confirmation based on the picked quantity without any further manual intervention.

What is the correct shipment configuration to meet this requirement?

- A. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Create Shipment process.
- B. Disable Auto Confirm Picks and select the check box "Create Shipments" in Pick Wave Release Rule.
- C. Disable Auto Confirm Picks, deselect the check box "Create Shipments," and schedule the Confirm shipment process.
- D. Disable Auto Confirm Picks, select the check box "Create Shipments," and schedule the Confirm Shipment process.

Correct Answer: C

QUESTION 3

How can split fulfillment lines in Order Management be managed independently?

- A. Split fulfillment lines can be managed independently because they are often being shipped from different warehouses.
- B. Split fulfillment lines can be managed with an orchestration process instance that has been created for them.
- C. Split fulfillment lines cannot be managed independently.
- D. Split fulfillment lines can be managed independently because they have different attributes.

Correct Answer: B

QUESTION 4

In which fulfillment process does a specific sales order demand trigger a supply creation, and a firm link is established between the sales order and the supply?

- A. Consignment order
- B. Internal Transfer
- C. Configure to order
- D. Back-to-back
- E. Drop Ship

Correct Answer: D

The back-to-back fulfillment process is one in which specific sales order demand triggers supply creation, and a link is established between the sales order and the supply.

QUESTION 5

Your customer is concerned about not having access to schedule orders and check availability when the Global Order Promising server is down. Which two statements are true? (Choose two.)

- A. Affected orders can be rescheduled based on supply chain availability search after server recovery.
- B. Global Order Promising continues promising orders based on supply chain availability search until the server or backup server can be restarted.
- C. Global Order Promising cannot continue promising orders, but the server or backup server is usually restarted quickly.
- D. Affected orders cannot be rescheduled based on supply chain availability search after server recovery.
- E. Global Order Promising continues promising orders based on lead-time availability until the server or backup server can be restarted.

Correct Answer: AB
