QUESTION 1

Which three are use cases for data maps? (Choose three.)

- A. To allow users to drill back to the data in a different cube.
- B. To integrate data between custom plan types and Planning modules
- C. To integrate data between Planning modules
- D. To push data from a planning cube to a reporting cube
- E. To create a replicated partition between cubes

Correct Answer: ABC

QUESTION 2

In porting data from a BSO plan type to an ASO plan type, which method cannot be utilized? Choose the best answer.

- A. Smart Push
- B. Data Maps
- C. XWRITE business rule
- D. Export/Import Capabilities

Correct Answer: C

QUESTION 3

After loading Workforce data from external systems, which statement describes actions you can take to make adjustments to loaded data and then calculate compensation expenses? Choose the best answer.

- A. In Workforce, change properties such as salary grade and FTE, and then calculate salary, benefits, additional earnings, and taxes based on assumptions in Planning.
- B. Change loaded salary information in Workforce and then run the data map for Compensation Data to calculate the updated benefits.
- C. Change loaded benefit information in Workforce such as options for medical benefits and then launch the compensation data business rule to calculate the updated benefit data.
- D. In Workforce, if you change both the selected benefit option and the rate, when compensation expenses are calculated, the value will be based on the benefit option's default value.

Correct Answer: D

QUESTION 4

Which statement describes infolets? Choose the best answer.

- A. Infolets help you personalize focused data slices that you frequently use for analysis.
- B. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.
- C. Infolets are predefined dashboards that give you insight into overall project financials and expense and revenue metrics.
- D. Infolets help you organize, track, and prioritize your workload.

Correct Answer: B

QUESTION 5

Which two client requirements align with using an ASO plan type alongside the module-based plan types? (Choose two.)

- A. The client would like to plan revenue by Product and Services dimensions.
- B. The client would like to report the results of the allocation process by Entity.
- C. The client would like to store 10 years of actuals history for reporting purposes but only requires prior year history for planning purposes.
- D. Due to sparse dimensionality, aggregation times are slow in the application.
- E. The client has 10 dimensions in the application and needs to report at each intersection.

Correct Answer: DE
