QUESTION 4

In what three ways can Service Administrators implement EPM Automate in Planning? (Choose three.)

- A. To copy data from an aggregate storage database to a block storage database
- B. To copy data from a block storage database to an aggregate storage database
- C. To execute scripts that complete tasks using a scheduler
- D. To import and export metadata, data, artifacts and snapshots
- E. To promote financial plans to the next level in the approval hierarchy

Correct Answer: BCD

Copy data from one database to another; typically, from a block storage database to an aggregate storage database. You can create scripts that are capable of completing a wide array of tasks and automate their execution using a scheduler. Import and export metadata, data, artifact and application snapshots, templates, and Data Management mappings.
