### QUESTION 1

In what three ways can Service Administrators implement EPM Automate in Planning? (Choose three.)

- A. To copy data from an aggregate storage database to a block storage database
- B. To copy data from a block storage database to an aggregate storage database
- C. To execute scripts that complete tasks using a scheduler
- D. To import and export metadata, data, artifacts and snapshots
- E. To promote financial plans to the next level in the approval hierarchy

Correct Answer: BCD

Copy data from one database to another; typically, from a block storage database to an aggregate storage database. You can create scripts that are capable of completing a wide array of tasks and automate their execution using a scheduler. Import and export metadata, data, artifact and application snapshots, templates, and Data Management mappings.

### QUESTION 2

What two form validation rules options are supported in Planning? (Choose two.)

- A. When enabled, execute validations associated with the form for all users regardless of access rights when validating the Approval unit.
- B. When enabled, all validations are run as the administrator and applied to the form members.
- C. When enabled, the user variable for the approval dimension on the form will be replaced by the approval unit member before the validations are run.
- D. When enabled, the system figures out which page combinations have potential data blocks and runs the validations regardless of those page combinations.
- E. When enabled, the form will be validated multiple times by replacing the user variable from the approval unit dimension with every possible value.

Correct Answer: CE

### QUESTION 3

Which two client requirements align with using an ASO plan type alongside the module-based plan types? (Choose two.)

- A. The client would like to plan revenue by Product and Services dimensions.
- B. The client would like to report the results of the allocation process by Entity.
- C. The client would like to store 10 years of actuals history for reporting purposes but only requires prior year history for planning purposes.
- D. Due to sparse dimensionality, aggregation times are slow in the application.
- E. The client has 10 dimensions in the application and needs to report at each intersection.

Correct Answer: DE
