### QUESTION 1

You just set up an application, and now you must assign security. The client informs you that they do not need to restrict access on a granular level.

Which data level approach should you take?

- A. You can grant access to users on ?dimension by dimension basis.
- B. You can use a data grant and specify the portions of data within the model that can be accessed by users, groups or users and groups.
- C. Security is only set on a granular level, so there is no need to assign access.
- D. You can grant access to users on the entire application.

Correct Answer: A
