QUESTION 1

Which Oracle Cloud service does NOT support Real Application Cluster database?

A. VM

B. Bare Metal

C. Exadata Cloud Service (both ExaCS and ExaCC)

D. Autonomous Database

Correct Answer: D

QUESTION 2

Resources are allocated to the DB system based on the shape selected.

Which two are options for a DB system? (Choose two.)

A. Two-Node Virtual Machine with Automatic Storage Management (ASM) as the storage management software

B. Single-Node Virtual Machine with Logical Volume Manager (LVM) as the storage management software for the "fast provisioning" option

C. Single-Node Virtual Machine with Local Storage

D. Two-Node Virtual Machine with Logical Volume Manager (LVM) as the storage management software

Correct Answer: AB

QUESTION 3

Which three actions can you perform on a DB system that has an Oracle Data Guard association with standby database? (Choose three.)

A. Use the reinstate command to return a failed database to the standby role after correcting the cause of failure.

B. Write on both primary and standby databases because DB system standby databases in Oracle Cloud Infrastructure Database are logical standbys.

C. Terminate a primary database in the DB system.

D. Switch over the primary database to the standby role, perform maintenance on the standby database, and then switch it back to the primary role.

E. Failover the standby database to the primary role if the primary database becomes unavailable.

Correct Answer: ADE

QUESTION 4

Your company\\'s security policy requires you to patch the database within a month of a relevant database patch being released by Oracle.Which method requires the least amount of down time?

A. Download the latest patch from MOS, back up your database, run a precheck, then apply the patch on the database home.

B. Own two Oracle Homes (OH193_A and OH193_B), each with a test database (193A and193B respectively).

C. Back up your database, run a precheck, then apply the patch on the database home where the database resides.

D. Download the latest patch from MOS, back up your database, and use dbaasc1i to apply the patch on the database home.

E. Create a new database home, patch it to the version you want, and then move the database to the new home.

Correct Answer: E

QUESTION 5

What is true about Security Lists?

A. You can delete the default Security List if it is not required.

B. A Security List is defined at the VCN level.

C. A Security List controls ingress and egress rules that specify the types of traffic allowed in and out.

D. The default Security List is shared by all the Subnets in the VCN.

E. The Security List rules can be applied to Storage servers to restrict access.

Correct Answer: C
