100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle
Official Exam Center

⚙ **Instant Download** After Purchase

⚙ **100% Money Back** Guarantee

⚙ **365 Days** Free Update

⚙ **800,000+** Satisfied Customers

QUESTION 1

What would you use to make Oracle Cloud Infrastructure Identity and Access Management govern resources in a tenancy?

A. Policies

B. Users

C. Dynamic groups

D. Groups

Correct Answer: A

POLICY A document that specifies who can access which resources, and how. Access is granted at the group and compartment level, which means you can write a policy that gives a group a specific type of access within a specific compartment, or to the tenancy itself. If you give a group access to the tenancy, the group automatically gets the same type of access to all the compartments inside the tenancy. For more information, see Example Scenario and How Policies Work. The word "policy" is used by people in different ways: to mean an individual statement written in the policy language; to mean a collection of statements in a single, named "policy" document (which has an Oracle Cloud ID (OCID) assigned to it); and to mean the overall body of policies your organization usesto control access to resources.

QUESTION 2

You want to create a stateless rule forSSH in security list and the ingress role has already been properly configured what combination should you use on the engress role what commination should you use on the egress rule?

A. select udp for protocol: enter 22 for source port" and all for destination port

B. select tcp for protocol: enter 22 for source port" and 22 for destination port

C. select tcp for protocol: enter all for source port" and 22 for destination port.

D. select tcp for protocol: enter 22 for source port" and all for destinationport

Correct Answer: C

QUESTION 3

Which WAF service component must be configured to allow, block, or log network requests when they meet specified criteria?

A. Protection rules

B. Bot Management

C. Origin

D. Web ApplicationFirewall policy

Correct Answer: A

Protection rules

Protection rules can be configured to either allow, block, or log network requests when they meet the specified criteria of a protection rule. The WAF will observe traffic to your web application over time and suggest new rules to apply.
