QUESTION 1

Which Cloud Guard component identifies issues with resources or user actions and alerts you when an issue is found?

- A. Problems
- B. Targets
- C. Detectors
- D. Responders

Correct Answer: C

Detector Performs checks to identify potential security problems based on activities or configurations. Rules followed to identify problems are the same for all compartments in a target. <https://docs.oracle.com/en-us/iaas/cloud-guard/using/part-start.htm>

QUESTION 2

As a security architect, how can you prevent unwanted bots while desirable bots are allowed to enter?

- A. Data Guard
- B. Vault
- C. Compartments
- D. Web Application Firewall (WAF)

Correct Answer: D

QUESTION 3

A company needs to have some buckets as public in the compartment. You want Cloud Guard to ignore the problem associated with public bucket. Select TWO correct answers

- A. Dismiss the issues associated with these resources
- B. Make the bucket private so that Cloud Guard won't detect it
- C. Configure Conditional groups for the detector to fix base line
- D. First make the bucket private and after few days make the bucket public again

Correct Answer: AC

QUESTION 4

Which statement is not true about Cloud Security Posture?

- A. Problems contain data about the specific type of issue that was found.
- B. Problems can be resolved, dismissed, or remediated.
- C. Problems are defined by the type of detector that creates them: activity or configuration.
- D. Problems are created when Cloud Guard discovers a deviation from a responder rule.

Correct Answer: D
