QUESTION 3

You have built a machine model to predict whether a bank customer is going to default on a loan. You want to use Local Interpretable Model-Agnostic Explanations (LIME) to understand a specific prediction. What is the key idea behind LIME?

A. Model-agnostic techniques are more interpretable than techniques that are dependent on the types of models.

B. Local explanation techniques are model agnostic, while global explanation techniques are not.

C. Global behavior of a machine learning model may be complex, while the local behavior may be approximated with a simpler surrogate model.

D. Global and local behaviors of machine learning models are similar.

Correct Answer: C

QUESTION 4

You want to make your model more parsimonious to reduce the cost of collecting and processing data. You plan to do this by removing features that are highly correlated.
