QUESTION 1

What preparation steps are required to access an Oracle AI service SDK from a Data Science notebook session?

- A. Call the Accented Data Science (ADS) command to enable AI integration
- B. Create and upload the API signing key and config file
- C. Import the REST API
- D. Create and upload execute.py and runtime.yaml

Correct Answer: B

QUESTION 2

You have an embarrassingly parallel or distributed batch job on a large amount of data running using Data Science Jobs

What would be the best approach to run the workload?

- A. Create the job in Data Science Jobs and then start the number of simultaneous job runs required for your workload.
- B. Create the job in Data Science Jobs and start a job run. When it is done, start a new job run until you achieve the number of runs required.
- C. Reconfigure the job run because Data science jobs does not support embarrassingly parallel.
- D. Create a new job for every job run that you have to run in parallel, because the Date Science Jobs service can have only one job run per job.

Correct Answer: A

QUESTION 3

During a job run, you receive an error message that no space is left on your disk device. To solve the problem, you must increase the size of the job storage. What would be the most efficient way to do this with Data Science Jobs?

- A. On the job run, set the environment variable that helps increase the size of the storage.
- B. Your code using too much disk space. Refactor the code to identify the problem.
- C. Edit the job, change the size of the storage of your job, and start a new job run.
- D. Create a new job with increased storage size and then run the job.

Correct Answer: C

**QUESTION 4**

You have trained three different models on your data set using Oracle AutoML. You want to visualize the behavior of each of the models, including the baseline model, on the test set. Which class should be used from the Accelerated Data Science (ADS) SDK to visually compare the models?

- A. ADS Explainer
- B. ADS Evaluator
- C. ADSTuner
- D. EvaluationMetrics

Correct Answer: D

QUESTION 5

Where do calls to stdout and stderr from score.py go in a model deployment?

- A. The predict log in the Oracle Cloud Infrastructure (OCI) Logging service as defined in the deployment.
- B. The OCI Cloud Shell, which can be accessed from the console.
- C. The file that was defined for them on the Virtual machine (VM).
- D. The OCI console.

Correct Answer: A
