QUESTION 1

You shut down a managed server by using the administration console. Which statement is always true?

A. The managed server was running on the same machine as the administration server.

B. Node Manager is configured properly and running on the managed server\\'s machine.

C. You can choose to shut down the server right away or after it completes its work.

D. The administration console calls WLST to accomplish the shutdown.

Correct Answer: C

QUESTION 2

You are using WebLogic Server Diagnostic Framework (WLDF) Instrumentation in a system diagnostic module. The Dye Injection monitor is enabled. You know the diagnostic context ID of the request you are Interested in that was processed by several. You are looking through the messages in the server log file of several.

Which statement is true?

A. You need to look at the Events Data Archive. Server log files do not contain WL DF context IDs

B. You need to look at the Harvested Data Archive. Server log files do not contain WL DF context IDs.

C. You need to look at the domain log file. Only the domain log file contains WL DF context IDs.

D. You can search the server log file for the context ID. Any message that was written to the log IDs during that request will contain the context ID.

E. You need to translate the context ID Into the corresponding transaction ID, which is the only ID in server log file entries.

Correct Answer: A
