QUESTION 1

You create a text item in the Object Navigator.

Which property must you change from the default value so that the text item will not be part of the SQL statement when a query is issued on the block?

- A. Item Type
- B. Column Name
- C. Conceal Data
- D. Database Item
- E. Query Allowed
- F. Calculation Mode
- G. Validate from List

Correct Answer: D

QUESTION 2

The Orders.fmb module contains two content canvases, both associated with the default window. Items from the DEPT data block are associated with the DEPTCAN canvas. Items from the EMP data block are associated with the EMPCAN canvas. The user wants to view DEPT and EMP data at the same time.

What changes would you make to the Orders form?

- A. Redefine the EMPCAN canvas as a tab canvas because it is not possible to display multiple content canvases in a single Forms module.
- B. Create a new WINDOW object called DEPTWIN. To associate the DEPTCAN canvas with the DEPTWIN window, set the DEPTCAN Window property to DEPTWIN.
- C. Redefine the EMPCAN canvas as a stacked canvas because it is not possible to display multiple content canvases in a single Forms module.
- D. Create a new WINDOW object called DEPTWIN. To associate the DEPTWIN window with the DEPTCAN canvas, set the DEPTWIN Primary Canvas property to DEPTCAN.
- E. Create a separate Forms module for the EMPCAN canvas and EMP data block, because it is not possible to display multiple content canvases in a single Forms module.

Correct Answer: B

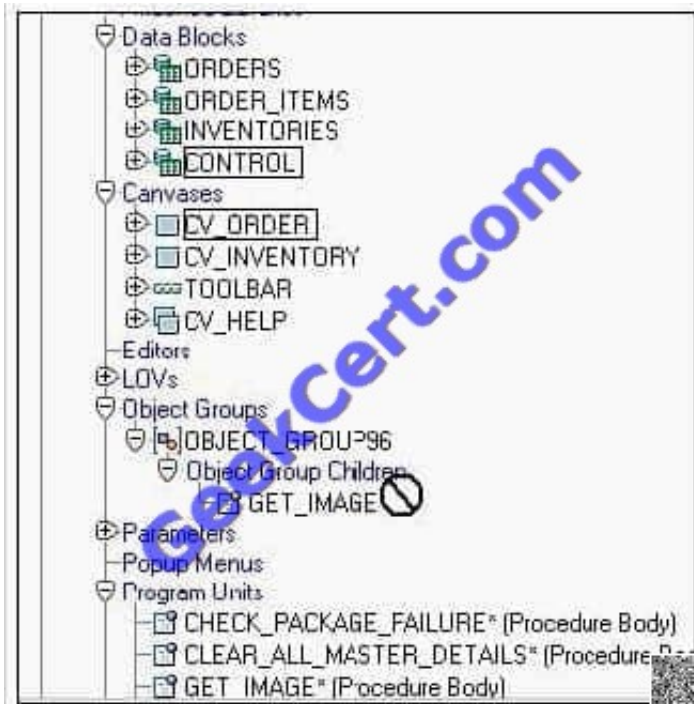

QUESTION 3

View the Exhibit.

You are attempting to drag the Control and CV_Order objects to an object group as shown in the exhibit, but you are unable to release them in the Object Group Children node of the object group.

What is the reason for this?

- A. You cannot drag a canvas to an object group.
- B. You cannot drag a block to an object group.
- C. You need separate object groups for different types of objects.
- D. You cannot drag multiple types of objects to an object group at the same time.
- E. You should drag them to the ObjectGroup96 node, not to its Object Group Children node.

Correct Answer: D

QUESTION 4

Your company assigns three possible credit ratings to customers: Poor, Good, and Excellent (represented numerically by 1, 2, and 3). The DBA has just added a RATING column to the CUSTOMERS table and has asked you to add an item

to your form so that credit ratings can be recorded. To restrict data entry clerks to one of these three values, you decide to create a radio group for the Rating item.

You want to allow for an undetermined (Null) credit rating, and users should be able to update the credit rating from a value to an undetermined rating.

How can you implement this?

- A. Create three radio buttons for each of the credit ratings, and set the Mapping of Other Values for the radio group to Null.
- B. Create three radio buttons for each of the credit ratings, and set the Mapping of Other Values for the radio group to one of the credit rating values.
- C. Create four radio buttons, and leave blank the value for the undetermined credit rating.
- D. Choose a different type of input item, because radio groups do not allow entry and update of null values.

Correct Answer: C

QUESTION 5

You created a query Record Group at design time.

Which built-in can you use to execute the query defined in the Record Group object?

- A. ADD_GROUP_ROW
- B. POPULATE _GROUP
- C. ADD_GROUP_COLUMN
- D. SET_GROUP_SELECTION
- E. CREATE_GROUP_FROM_QUERY
- F. POPULATE _GROUP_WITH_QUERY

Correct Answer: B
