### QUESTION 1

Which Server Administration feature can be configured to notify the Administrator when a server component reaches an undesired state?

- A. Audit trail
- B. System Alerts
- C. Siebel State Model
- D. Component Event Logging

Correct Answer: B

---

### QUESTION 2

CHENG has a Call Center agent position and has no one reporting to him. You have given him a responsibility that includes the "Manager\\'s Account List View" (My Team\\'s Account filter). What will be the outcome?

- A. You will get an error because you cannot assign a manager view to someone who does not have a manager position.
- B. The view will not display to him since he doesn\\'t have a manager position.
- C. He will see the view, but he will not see any records.
- D. He will see the view, but he will only see records for which he is the primary on the Account Team.

Correct Answer: D

---

### QUESTION 3

Your team extended the Siebel database by creating a new stand-alone table. Select the two true statements. (Choose two.)

- A. This table does not contain a ROW\_ID column.
- B. The user key for this table is ROW\_ID, NAME, TYPE.
- C. The table cannot be added to an existing dock object.
- D. This table contains a PAR\_ROW\_ID column acting as a foreign key to the S\_PARTY table.
- E. You can create an intersection table to support M:M relationships between business components based on this table and other business components.

Correct Answer: CE

---

#### QUESTION 4

You are creating a new view in Siebel Tools. When you attempt to add applets, you do not see the applet you want to add listed in the Available Applets list. Which two would cause this? (Choose two.)

- A. You failed to assign a Project.
- B. You picked the wrong Web Template.
- C. You selected the wrong Business Object for the view.
- D. The applet object definition has Inactive set to FALSE.
- E. The Business Component that the applet is based on is not part of the Business Object the view is based on.

Correct Answer: CE

---

#### QUESTION 5

You have reached a critical point in your development, and you wish to back up the objects you have configured so far. Which is NOT a valid method for backing up your object definitions?

- A. Copy the local .srf file.
- B. Copy the local .dbf file.
- C. Check in projects into the server.
- D. Use archive files to back up repository data.

Correct Answer: A
