QUESTION 1

Which three statements are true about the AD Merge program? (Choose three.)

- A. The AD Merge Patch creates the merged patch driver files and copies the actual files needed by the merged patches into the destination directory.
- B. You can merge patches without unzipping the automated release updates by using the manifest file. The manifest file is a text in which you document the location and names of the patch zip files. The contents of a manifest file would resemble the following: /home/applmgr/patches/p123456_11i_GENERIC.zip
/home/applmgr/patches/p233455_11i_SUN.zip /home/applmgr/patches/p902345_11i_LINUX.zip
- C. The AD Merge Patch supports both split patch driver files and unified patch driver files. If all the source patches have split driver files, the merged patch has split driver files. If any of the source patches has a unified driver file, the merged patch has a unified driver file.
- D. When merging patches, the source and destination directories cannot be child or parent directories of each other. It is recommended to run AD Merge Patch from the parent directory of the source directory, and the destination directory should also be located in the same parent directory.

Correct Answer: ACD

QUESTION 2

A company has implemented Oracle Applications Release 12. It wants to configure a system that sends emails to key database administrators (DBAs) when a tablespace in the Oracle Applications database does not have adequate free space. Identify which component in the Oracle Applications technology layer performs this task.

- A. Oracle Alert
- B. Oracle Workflow
- C. Oracle E-mail Notification
- D. Oracle Applications Framework

Correct Answer: A

QUESTION 3

Where is the AutoPatch executable located in Oracle Applications R12?

- A. \$AD_TOP
- B. \$AU_TOP/bin
- C. \$AD_TOP/bin
- D. \$APPL_TOP/admin
- E. \$COMMON_TOP/bin

Correct Answer: C

QUESTION 4

How do you restore an older configuration (a configuration that is older than that immediately prior to the current one) in the Oracle Applications R12 environment?

- A. Use the restore.sh rollback script and run the AutoConfig script to generate new configuration files.
- B. Use the Support Cart feature in Oracle Applications Manager (OAM) and run the AutoConfig script to generate new configuration files.
- C. Use the Context Editor Wizard from the command line and run the AutoConfig utility manually from /bin.
- D. Use OAM AutoConfig to compare and replace individual values in the current configuration with the corresponding values from the older configuration, and save them. Then run the adautocfg.sh script.

Correct Answer: D

QUESTION 5

Identify three modes in which AutoPatch can be run, in addition to the normal patch application mode. (Choose three.)

- A. hotptch
- B. Test mode
- C. Pre-install mode
- D. Non-interactive operation
- E. Patch Impact Analysis Mode

Correct Answer: BCD
