QUESTION 1

You have created a container in Oracle Storage Cloud Service. How would you upload a file to that container when using a REST API call?

- A. You cannot upload files using REST API calls.
- B. Send a PUT request to `{accountURL}/{containerName}`.
- C. Send a PUT request to `{accountURL}/{containerName}/{objectName}`.
- D. Send a POST request to `{accountURL}/{containerName}/{objectName}`.
- E. Send a POST request to `{accountURL}`.

Correct Answer: C

QUESTION 2

How does Oracle Storage Cloud Software Appliance ?Cloud Distribution work?

- A. It copies data from specified storage volumes in Oracle Compute Cloud Service to Oracle Storage Cloud Service on demand.
- B. It stores all data in storage volumes attached to the Oracle Compute Cloud Service VM that hosts the appliance and uploads only infrequently accessed data to Oracle Storage Cloud Service.
- C. It immediately writes data to containers in Oracle Storage Cloud Service as soon as applications write files to the appliance.
- D. It uploads data to Oracle Storage Cloud Service according to the synchronization schedule defined by the user.
- E. It caches data written by applications in storage volumes attached to the Oracle Compute CloudService virtual machine (VM) that hosts the appliance and copies all the data asynchronously to Oracle Storage Cloud Service.

Correct Answer: B

QUESTION 3

Which two methods can customers use to control and secure their data in Oracle Storage Cloud Service?

- A. Set up RSA read and write key pairs on containers.
- B. Through RESTful web services, invoke Oracle Data Masking on objects stored.
- C. Use the Java client to encrypt data when stored and decrypt data when retrieved.
- D. Assign read and write permissions to containers to restrict access to data.
- E. Through RESTful web services, invoke SPARC M7 processor 128-bit encryption.

Correct Answer: CD

QUESTION 4

You have added an instance to three security lists: seclistA, seclistB, and default security list. You have defined three security rules that reference those security lists as a destination, apart from the EnablePublicSSHAccess security rule. Now you want to disable access to this instance from all internal and external sources over all protocols except SSH.

- A. Set the outbound policy for two security lists to DENY.
- B. Create a new security rule to enable SSH access to the instance.
- C. Add the instance to a new security list.
- D. Disable all three security rules that you have created.
- E. Remove the instance from all three security lists.
- F. Set the inbound policy for all three security lists to DENY.

Correct Answer: CEF

QUESTION 5

To handle large amounts of unstructured data, how does Oracle Storage Cloud Service store data and in what form?

- A. in evenly-sized blocks, each with its own address
- B. as files in a directory structure or as objects in top-level containers, based on the storage model that is chosen for the account
- C. as objects in a flat hierarchy of containers
- D. as files in a nested hierarchy of containers, similar to a directory structure on the hard disk drive of a laptop
- E. as compressed zip files

Correct Answer: C
