QUESTION 1

When building test cases in Policy Modeling, when should you add a "Keep" column?

- A. saving test data to a separate spreadsheet
- B. preventing values in the Actual column from being replaced
- C. comparing results from a baseline version of the policy model against a newer version
- D. saving a test case
- E. saving an input value

Correct Answer: B

QUESTION 2

Which two operators must you use in a procedural rule to enforce collection of all entity-level data for all entity instances?

- A. For
- B. ExistsScope
- C. ForAll
- D. Exists
- E. InstanceCount
- F. Known

Correct Answer: DF

QUESTION 3

You created a policy model and now want to deploy the current project to the Hub. You also want to restrict the interview so that it cannot be utilized anonymously by end users.

Which two steps are required to accomplish these two goals?

- A. Through Policy Modeling, click Deploy Snapshot and enter your credentials to deploy your project.
- B. Through Policy Modeling, click Mapping Settings and configure which group should be able to access the interview.
- C. Through the Hub, click Deploy New Project and navigate to your project to deploy your project.
- D. Through the Hub, click Access Settings and configure which group should be able to access the interview.

Correct Answer: BD

QUESTION 4

Which three statements are correct about explanations and audit reports?

- A. Explanations can only be added to the final screen in an interview.
- B. Explanations can be saved, audit reports cannot.
- C. Explanations are automatically saved to a data source when one is available.
- D. Audit reports are automatically saved to a data source when one is available.
- E. Explanations can be shown in a Form, audit reports cannot.
- F. Explanations can be shown on an interview screen, audit reports cannot.
- G. Silent and Invisible tags control the information that is shown in an explanation, not in an audit report.

Correct Answer: AEG

QUESTION 5

the employee's clock in time minutes = ExtractMinute(the employee's actual clock in time)

the employee's clock in time minutes remainder = Remainder(the employee's clock in time minutes, 15)

the adjusted employee's clock in time	
AddMinutes(the employee's actual clock in time, - the employee's clock in time minutes remainder)	the employee's clock in time minutes remainder < 9
AddMinutes(the employee's actual clock in time, (15 - the employee's clock in time minutes remainder))	otherwise

You have created a policy model which adjust employee shift start and end times, to align with an existing payroll system.

If an employee clocked in at 09:22, what will the value of the adjusted employee's clock in time be?

- A. 09:15
- B. 09:30
- C. 09:25
- D. 09:20

E. Uncertain

F. 09:00

G. 10:00

Correct Answer: B
