QUESTION 1

Which are three practices that developers can use to enhance performance, scalability, and availability of Oracle Database-driven applications?

- A. Implement primary and foreign keys, enforce database integrity, joins, message queuing, maintenance of sequences outside of the database.
- B. Use Big Data to hold everything into one big table.
- C. Maintain and analyze performance statistics using AWR and ADDM.
- D. Eliminate hot spots in applications, monitor, measure, and optimize SQL statement execution.
- E. Perform testing with Real Application Testing.

Correct Answer: ACE

QUESTION 2

For which use case would you utilize SQL Performance Analyzer and optimizer pending statistics functionality?

- A. to test performance after an upgrade to an Oracle Real Application Cluster
- B. to test performance of an Operating System patch
- C. to test effect of new Optimizer statistics
- D. to test performance after a database upgrade
- E. to test performance just after a database reboot

Correct Answer: A

QUESTION 3

When preparing a new database installation, you want to ensure automatic collection of timed statistics. Which three configuration parameters are applicable?

- A. STATISTICS_LEVEL parameter set to TYPICAL
- B. STATISTICS_LEVEL parameter set to All
- C. TIMED_STATISTICS parameter set to true
- D. ALL_TIMED_STATISTICS parameter set to TRUE
- E. AUTO_STATS parameter set to TRUE
- F. STATISTICS_LEVEL parameter set to BASIC.

Correct Answer: ABF

QUESTION 4

IT Operations had observed short CPU spikes and I/O storms prior to a retail website outage. Which functionality of Diagnostics Pack for Oracle Databases would you implement to diagnose and resolve the customers issue?

- A. Active Workload History to collect SQL at the time of its execution.
- B. SQL Performance Analyzer to capture the information in the SGA, the sessions active, and analyze the SQL executing.
- C. Oracle Workload Advisor that automatically turns on and captures the offending SQL Statements when thresholds are reached.
- D. Active Session History to capture sessions and dump the SQL executing, performance attributes and relevant information into a buffer for analysis.
- E. Active SQL History Analyzer to do perform a comparison of SQL statements before and after.
- F. Oracle Exadata, as it already includes Diagnostic Pack for Oracle Database.

Correct Answer: F

QUESTION 5

Which background process performs Automatic Workload Repository (AWR) tasks such as writing when a metric violates its threshold value, taking snapshots, and capturing statistics for recently modified SQL objects?

- A. LGWR
- B. DBWR
- C. CKPT
- D. MMON
- E. MMNL

Correct Answer: D
