QUESTION 1

Which two statements are true about Automatic Statistics collection by the Optimizer?

- A. Statistics are collected during automatic maintenance tasks.
- B. Any fixed objects are disregarded.
- C. Any external tables are incorporated.
- D. All tables in the data dictionary are included by defaults.
- E. Statistics are gathered after table statistics are marked stale.

Correct Answer: AE

QUESTION 2

Which option is recommended when gathering Optimizer system statistics on a regular basis to ensure optimal performance?

- A. lock out user sessions and gather system statistics overnight
- B. gather system statistics after a performance issue has been reported
- C. gather system statistics for several hours when there is no workload
- D. gather system statistics for several hours during normal workload periods
- E. shut down any running applications prior to collection

Correct Answer: D

QUESTION 3

An advanced fault diagnostic infrastructure introduced as of Oracle Database 11g, assigns an incident number and diagnostic data when a critical error occurs. What is the feature and where does it store that data?

- A. Oracle Enterprise Manager. Data is stored in the OEM Repository.
- B. MyOracle Support. Data is stored in Oracle Cloud.
- C. Automatic Workload Repository. Data is stored in views inside the Oracle database.
- D. Automatic Diagnostic Repository. Data is stored in views inside the Oracle database.
- E. Automatic Diagnostic Repository. Data is stored in a file-based repository outside the database.

Correct Answer: E

QUESTION 4

For which two capabilities would you implement Segment Advisor in order to aid a customer trying to find and fix performance issues related to database space?

- A. to determine if objects have unusedspace that can be released
- B. to advise if materialized views can be used to reduce size of views
- C. to review space usage of individual schema objects or tablespaces
- D. to advise if there are any duplicate indexes and automate their removal
- E. to identify any fragmentation in the database cache or swap space

Correct Answer: AC

QUESTION 5

Which three are benefits of implementing an Oracle Database Performance and Tuning solution?

- A. automated database diagnostics based on deep database kernel integration
- B. a library of hundreds of PL/SQL procedures to choose from for writing scripts to instrument the database to collect performance information
- C. monitor and alert on every Oracle Database Database Dictionary view using SNMP MIBS built into the Optimizer
- D. the most extensive and up-to-date collection of database monitoring and tuning scripts
- E. built-in instrumentation, real-time and historical monitoring, and data collection
- F. a performance methodology

Correct Answer: DEF
