QUESTION 1

Which statement accurately describes how to use SOA Suite to create a REST interface for a provider application that does not support REST?

- A. Oracle Service Bus must be used. An HTTP proxy service is created and a pipeline is added with a conditional branch for each HTTP verb that the interface will serve. If there is any non- XML payload, such as JSON, an external parser service must be used to translate it to XML.
- B. Use Oracle Service Bus or BPEL Process Manager and utilize the REST binding that is available for both. The REST binding will automatically translate a REST payload from JSON or XML to SOAP/XML for processing in the middleware layer.
- C. Use a BPEL process with a REST binding and utilize the nXSD activity to translate the native JSON payload to XML for processing.
- D. Use the HTTP transport in Oracle Service Bus for the REST interaction and use nXSD to translate the JSON payload to XML for processing.

Correct Answer: C

QUESTION 2

When more than one policy is attached to a policy subject, the combination of policies needs to be valid. Which statement is true about the valid combination of policies for a policy subject?

- A. Only one MTOM policy can be attached to a policy subject.
- B. More than one Reliable Messaging policy can be attached to a policy subject.
- C. You cannot have both a Reliable Messaging policy and a WS-Addressing policy attached to the same policy subject
- D. Only one security policy can be attached to a policy subject

Correct Answer: A

QUESTION 3

You want to configure Oracle SOA Suite for Maximum Availability Architecture (MAA). Which two activities must be completed?

- A. Add managed servers to the domain configuration to support the Oracle SOA Suite cluster.
- B. Run the Configuration Wizard on each server that will host Oracle SOA Suite managed servers.
- C. Rework the Oracle SOA Suite domain configuration to use appropriate GridLink or multiple data sources.
- D. Manually retarget the Oracle SOA Suite deployments to the newly created cluster.

Correct Answer: C

QUESTION 4

Which statement accurately describes deploying your SOA application to a cluster?

- A. Manually deploy the application to each managed server in the cluster.
- B. After deployment, restart each managed server in the cluster before the application is available for service.
- C. Use WebLogic Server Administration Console for deployment because you cannot deploy to a cluster from JDeveloper.
- D. Treat your cluster as a single deployment target and let the administration server automatically deploy the application to all the managed servers in the cluster.

Correct Answer: D

QUESTION 5

Which two statements are correct about the Oracle Enterprise Scheduler Service (ESS) facility?

- A. It is a Java EE application that is deployed to WebLogic Server to provide distributed job request processing across a single WebLogic Server or a collection of WebLogic Servers.
- B. It is shipped as a separate product and you can install it after you have completed the SOA Suite installation.
- C. It is used extensively by Fusion Applications so it is well-tested.
- D. It is administered via the WebLogic Server Administration Console.

Correct Answer: AD
