### QUESTION 1

What does the Oracle B2B component do for an end-to-end EDI transaction?

- A. EDI translation, validation, and transformation
- B. only EDI translation and validation, but not transformation
- C. only transformation, but not translation or validation
- D. defines EDI documents, but does not do translation, validation, or transformation

Correct Answer: B

---

### QUESTION 2

Which two are features of Event Delivery Network (EDN)?

- A. JMS-based point-to-point architecture that is based on queues.
- B. JMS-based publish/subscribe architecture that is based on topics.
- C. support for Oracle AQ as a provider
- D. separately installable to allow for flexible deployment
- E. support for durable subscriptions so that, in order to receive events, the subscriber need not be running

Correct Answer: AC

---

### QUESTION 3

To support invocation of a SOAP web service from BPEL, you import the WSDL of the web service into your SOA project. The local WSDL copy contains no partner link types. You create a partner link for the web service in the BPEL designer.

How does JDeveloper ensure the request partner link types are provided?

- A. It automatically creates a wrapper WSDL to contain partner link types.
- B. It automatically injects the partner link types into the local WSDL copy.
- C. It prompts you to add the partner link types to the SOAP web service implementation.
- D. It prompts you to manually add the partner link types to the local WSDL copy.

Correct Answer: A

---

### QUESTION 4

Which challenge presented by heterogeneous IT architectures does the Oracle Service Bus transport abstraction comprehensively address?

- A. tightly coupled business services integration due to complex and hardwired connections
- B. difficulty managing deployed services due to disparate protocols and applications involved
- C. inherent replication of transport, transformation, security and routing details
- D. exponential redevelopment and redeployment efforts when service endpoint interfaces change

Correct Answer: C

---

#### QUESTION 5

Which two are correct statements about the Oracle Cloud Adapter for Salesforce.com?

- A. It uses either HTTP basic authentication or username token authentication to perform secure interaction with Salesforce.com.
- B. It can make both synchronous and asynchronous calls through the Salesforce.com SOAP API.
- C. Behind the scenes, it uses the SOAP API provided by Salesforce.com.
- D. The design-time tooling generates a WSDL that is different from the enterprise WSDL available from Salesforce.com.

Correct Answer: C
