### QUESTION 1

Which two are valid scenarios for looping by using XSL Snippets?

- A. The data needs to be formatted before being used in loop conditions.
- B. The grid selector cannot handle the conditions that you need to implement.
- C. The data in the line item grid must be displayed as a table.
- D. You want to display a table of single-select, quote-level Commerce attributes.

Correct Answer: CD

---

### QUESTION 2

You need to add the same part number twice to a configuration but in two separate line items. What must you do to achieve this?

- A. This is the default behavior and no setting needs to be changed.
- B. Recommend the parts by using an advance BML script.
- C. Ensure that the Identifier is set in the result statement.
- D. Ensure that the configuration option Sum Recommended Items Quantity is not selected and that the Identifier is set in the result statement.

Correct Answer: C

---

### QUESTION 3

What is a recommended approach to keep in mind when implementing the Commerce pricing function?

- A. Ensure that parts and prices are added in the part database.
- B. Ensure that the part database is indexed.
- C. Use data structures such as dictionaries to store line information that needs to be referenced later in the code. A hash is faster than looping each time.
- D. Ensure that Ajax is enabled.

Correct Answer: A

---

#### QUESTION 4

You want to run a Constraint rule only when an action is performed by a user. Which two options are true?

- A. Constraint rules are Ajax-based and there is no option to disable Ajax in Commerce rules.
- B. You can implement the requirement by invoking the Constraint rule from the action.
- C. You can use Validation rules because it better serves the purpose.
- D. You can implement the requirement by using a timer.

Correct Answer: BD

---

#### QUESTION 5

In Configuration, when does the "Constraint rule on a hidden attribute" error occur?

- A. when Hiding rules run first and hide the values that are to be constrained
- B. when Hiding rules run first and they hide attributes when a condition is true
- C. when Constraint rules run first and when conditions for both the Constraint and Hiding rules are true
- D. when Constraint rules run first and the attribute values are hidden before a Hiding rule can be triggered

Correct Answer: D
