QUESTION 2

Your application has the requirement to create a shopping cart feature with multiple pages to search and select items and separate pages to pay and finalize the transaction.

When defining this feature in MAF, which single content type is the correct choice?

- A. fragment
- B. local AMX
- C. local HTML
- D. declarative component
- E. remote URL
- F. bounded task flow
- G. unbounded task flow
- H. remote task flow

Correct Answer: DEF

QUESTION 3

If you want to create your own custom Springboard rather than use the out-of-the-box one, which two artifacts would you need to create?

- A. unbounded task flow
- B. feature

- C. AMX page
- D. menu items
- E. side bar

Correct Answer: AE

QUESTION 4

When developing a MAF application for service technicians, you determine that the mobile technician will need to extensively describe the condition of the item he or she is servicing, including the area that is broken and any other pertinent details.

How would you implement this in an MAF application to avoid excessive typing?

- A. Use a remote URL page to enable the technician to specify the description in a browser- based page.
- B. Use the camera integration feature to allow the technician to take a photo of the serviced item.
- C. Use an input text area to allow for multiple lines of text.
- D. Use the voice recognition integration feature to allow the technician to enter details by voice.

Correct Answer: D

QUESTION 5

Which two statements are true about the scope of data control instances in AMX features?

- A. Data control instances have a global scope and can be used to share data state across AMX features.
- B. Data control instances have a per AMX feature scope and cannot be used to share data across features.
- C. Data control instances are in an application scope and can be used to share data between features of any technology.
- D. Data control instances can be used to share data state between views in a bounded task flow.

Correct Answer: BD
