### QUESTION 1

Which three roles or activities are commonly performed by mobile application developers?

- A. help the service designer specify the service interface
- B. select the back-end service technologies for the OS, implementation language, and database
- C. evaluate how the mobile app will interact with the back-end services and design the application with caching and battery life in mind
- D. specify the scaling of the back-end services for optimal performance
- E. thoroughly consider the ergonomics of the application to make it easy and intuitive to use

Correct Answer: BCD

---

### QUESTION 2

A service developer is creating a service that will be used by mobile clients. Which piece of advice should the developer consider while designing it?

- A. Design for next generation interfaces to ensure that their services will not need to change in the future.
- B. Carefully choose the implementation language and the monitoring capabilities.
- C. Consider the interface types, payloads types, and security approaches which are easily consumed by mobile devices.
- D. Create services that are arcane in nature to enhance the security of the services.

Correct Answer: C

---

### QUESTION 3

Which is a feature of Oracle Mobile Application Framework?

- A. It provides a simple Objective-C coding experience.
- B. It provides a choice between the two development languages, Java and JavaScript.
- C. It enables you to run Android Dalvik Java code on iOS.
- D. It enables you to create web mobile pages that are served from a Java EE server.
- E. It leverages PL/SQL to create on-device applications.

Correct Answer: B
