QUESTION 1

For a MAF application to register anURL scheme to be invoked by other applications on the device, it must define two things. First, it defines the URL scheme in themaf- application.xmlfile.

What is the second thing the application must do to be invoked and handle the event when the application is initiated by the URL scheme?

A. In themaf-application.xmlfile, define an event listener with an associated Java class to respond.

B. Within the application\\\'s LifeCycleListenerImpl.start() method, register an EventListener to fire and respond to the event.

C. Include an URL scheme Cordova plugin to respond to the event on each platform.

D. In themaf-application.xmlfile, configure the `Push-Notification\\\' device access privilege.

Correct Answer: B

QUESTION 2

You are debugging an MAF application. The application stores the total cost of items in the user\\\'s shopping cart in a managed bean variable. The total cost is then displayed in an AMX page via anamx:outputTextcomponent. A button is pressed on the pageto add another item to the shopping cart, and, as a result, the total cost value is changed in the managed bean. However, you notice that the value is not changed in the AMX page.

Which is the reason for this behavior?

A. The total cost variable does not have aPropertyChangeListenerfiring on data change.

B. The scope of themanaged bean ispageFlowScope.

C. The variable is anintinstead of adouble.

D. Theamx:outputText partialTriggerproperty must include the ID of theamx:commandButtonthat is invoking the change.

Correct Answer: D

QUESTION 3

In an AMX page, you want to hide/show a button based on the mobile device having a camera. Which is a valid EL expression to test for the camera?

A.

B.

C.

D.

Correct Answer: A

QUESTION 4

Your customer currently builds native Android applications. He is intrigued by the cross- platform capabilities of Oracle MAF, but fears that distribution through the Apple App Store is complex to set up and expensive.

Considering that your customer wants to distribute his applications to the general public and not inside his or her own organization, which three explanations can you provide about the Apple App Store to appease your customer\'s fears?

A. Apple offers subscriptions to its Xcode development tools. It is possible to publish to the App Store for free with an active subscription.

B. Apple provides the iOS provisioning profile and certificate you need to sign the application, but you do not need to use Apple\'s tools directly to package your MAF application since JDeveloper and OEPE will

do the work for you if properly configured.

C. Publishing MAF applications to the App Store is very simple because you submit them to Oracle and not to Apple.

D. If you plan to sell your applications instead of providing them for free, you need to enroll in the iOS Developer Enterprise program.

E. To publish to the App Store as an individual, only membership in the entry-level iOSDeveloper Program is required. Appleasks for a nominal annual membership fee. There is no need to enroll in the iOS Developer Enterprise Program.

F. Oracle has published numerous MAF applications to the AppleAppStore without any problems and will update the MAFframework if Apple\'s submission requirements are changed.

Correct Answer: BEF

QUESTION 5

You need to write code in a managed bean that will get the list of the application\'s features in order to perform navigation. Which Java object has the method that you could use to get that list?

A. AdfmfiosFeatures

B. AdfmfContainerUtilities

C. AdfmfFeaturesUtility

D. AdfmfJavaUtilities

E. You can do this only from a JavaScript library.

Correct Answer: D
