QUESTION 1

Identify the application that is used to build and package applications as a set and that enables deployment by Oracle Enterprise manager.

A. Oracle Virtual Application Builder

B. Oracle Virtual Assembly Builder

C. Oracle Application Jesting Suite

D. Oracle Real Application Testing

E. Oracle Package Builder

Correct Answer: B

Oracle Virtual Assembly Builder makes it possible for administrators to quickly configure and provision entire multi-tier application topologies onto virtualized and cloud environments. It provides a framework for capturing the configuration of existing software components and packaging them as self-contained building blocks known as appliances. These appliances can then be easily connected to form application blueprints known as assemblies. This innovative approach makes it practical for complex enterprise applications to easily be customized and provisioned in their entirety with minimal to no manual intervention onto virtualized and cloud environments.

Reference. ORACLE VIRTUAL ASSEMBLY BUILDER, Oracle Data Sheet

QUESTION 2

Which three activities can be performed with the Oracle Enterprise manager Groups functionality?

A. Monitor outstanding alerts and policy violations as a group.

B. Perform administrative tasks on a group.

C. Monitor the overall performance of a group and view the performance summary of targets within the group.

D. Monitor a group of LUNs used by a database for storage.

E. Perform administration on a user group.

Correct Answer: BCE

C: An Administration Group is a special type of group designed to automatically deploy management settings (monitoring templates, compliance standards, cloud policies) to targets when they join the group. Administration Groups are created by defining their membership criteria based on target properties.

Note:

* The group home page continues to provide an overview of the status and health of members of the group and a central way to launch operations on the groups, such as submit jobs, start blackouts, and so forth.

QUESTION 3

Which pack for Oracle Enterprise Manager would you use to manage a BPEL process?

A. Provisioning and Patch Automation Pack for Oracle Middleware

B. SOA Management Pack EE

C. Diagnostics Pack for Oracle Middleware

D. Real User Experience Insight Pack

Correct Answer: B

Oracle Enterprise Manager SOA Management Pack Enterprise Edition

Configuration information for the Oracle SOA Suite, Oracle Service Bus, and BPEL processes are collected and stored in the Oracle Enterprise Manager repository. With this information, administrators can:

View the historic configuration changes across the SOA Suite and Oracle Service Bus environment

Baseline a working configuration by saving it in the repository

Compare BPEL and Oracle Service Bus server and domain configuration parameters with other servers and domains

Compare BPEL process versions to observe changes across successive deployments

Reference: Oracle Enterprise Manager SOA Management Pack Enterprise Edition, Data Sheet

QUESTION 4

When you size the Oracle Enterprise manager management Service (OMS), what are the three key criteria that you need to keep in mind?

A. Amount of jobs to dispatch

B. Volume of notifications to send out

C. Number of agents (including state and metric data) uploading information

D. Volume of deployment procedures

E. Amount of history kept in the repository

Correct Answer: BCE

Oracle Management Service is a Web-based application that orchestrates with the Management Agents and the Management Plug-ins to discover targets, monitor and manage those targets, and store the collected information in a repository for future reference and analysis. Oracle Management Service also renders the user interface for Enterprise Manager Cloud Control. Oracle Management Services is deployed to the Oracle middleware home (middleware home), which is the parent directory that contains the Oracle WebLogic Server home, the Oracle Management Service home, the Management Agent home, the plug-in home, the Java Development Kit (JDK), the Oracle Management Service instance base directory, the Oracle Web tier directory, the Oracle common directory, and other relevant configuration files and directories. While deploying the Oracle Management Service, the Enterprise Manager Cloud Control Installation Wizard installs Oracle WebLogic Server if it does not already exist in your environment. As a result, an

Oracle WebLogic Server administration console is also installed.

QUESTION 5

Identify three unique capabilities of the Oracle Enterprise manager Application Management Pack for Fusion Applications.

A. Captures technical configuration and topology information that is specific to Oracle Fusion Applications

B. Organizes and displays data by the Oracle Fusion Applications product

C. Captures functional usage heuristics and histograms related to Oracle Fusion Applications

D. Executes testing scripts for Oracle Applications

E. Organizes and displays data by family of Oracle Fusion Applications

Correct Answer: BCE

*

 Fusions Apps user session diagnostics and full session replay

*

 Fusion Apps user flow tracking, including transaction abandonment analysis

*

 Customizable dashboards per application, user group segmented

*

 Data warehouse integration, OLAP-based reporting

*

 KPI to data store correlation analyses

*

 Integrated problem diagnostics and impact analyses

*

 Capture true user sessions as a source for QA testing via Oracle Application Testing Suite and/or
