QUESTION 1

When you create reports using Information Publisher, which three statements are true?

A. You always start from the beginning when you create custom reports.

B. Both default categories and subcategories can be used for out of the-box reports.

C. Time-period and/or target parameters can be used for viewing reports.

D. Using reporting elements, you can add a variety of information to your report.

E. No additional customization is provided after the reporting elements are assembled.

Correct Answer: BCD

C: By declaring report parameters, you allow the user to control what data is shown in the report. There are two types of parameters: target and time-period.

D: Reporting elements are pre-defined content building blocks, that allow you to add a variety of information to your report. Some examples of reporting elements are charts, tables, and images.

Incorrect:

Not A: To create custom reports:

Choose whether to modify an existing report definition or start from scratch. If an existing report definition closely matches your needs, it is easy to customize it by using the Create Like function.

Not E: Custom Reports

Although the predefined report definitions that come with Information Publisher cover the most common reporting needs, you may want to create specialized reports. If a predefined report comes close to meeting your information

requirements, but not quite, you can use Information Publisher\'s Create Like function to create a new report definition based on one of the existing reports definitions.

QUESTION 2

The shared file system loader configuration on the Oracle Enterprise management Service is for _____.

A. Auditing

B. Security

C. High availability

D. High availability and security

Correct Answer: C

The Management Service for Grid Control has a high availability feature called the Shared Filesystem Loader. In the Shared Filesystem Loader, management data files received from Management Agents are stored temporarily on a common

shared location called the shared receive directory. All Management Services are configured to use the same storage location for the shared receive directory. The Management Services coordinate internally and distribute among themselves

the workload of uploading files into the Management Repository. Should a Management Service go down, its workload is taken up by surviving Management Services. You must choose a shared receive directory that is accessible by all the

Management Services using redundant file storage.

Note:

Oracle strongly recommends you to configure a shared file system loader so that a common location is maintained to store all the metric data files uploaded by the Management Agents.

QUESTION 3

You have experienced a service failure and want to evaluate the availability status of the subservices and key components to determine why the service failed. What technique will allow you to do this?

A. Root cause analysis

B. Analysis of the .log file

C. Analysis of the soapct1.log file

D. Analysis of emct1.log

Correct Answer: A

Root Cause Analysis: Diagnostic tool to help determine the possible cause of service failure. Reference: Oracle Enterprise Manager Concepts

QUESTION 4

Oracle Enterprise Manager Groups enable users to _____.

A. Send email notifications based on Repeat Frequency

B. Specify monitoring and policy settings once and apply them as often as needed

C. Group only homogeneous targets

D. View the summary status of the targets within the group

Correct Answer: B

*

 Enterprise Manager Groups enable administrators to logically organize distributed targets for efficient and effective

management and monitoring

*

 By combining targets in a group, Enterprise Manager provides management features that enable you to efficiently manage these targets as one group. Using the Group functionality, you can:

/ View a summary status of the targets within the group. / Monitor incidents for the group collectively, rather than individually.

/ Monitor the overall performance of the group.

/ Perform administrative tasks, such as scheduling jobs for the entire group, or blacking out the group for maintenance periods.

QUESTION 5

Which two statements are true about Oracle Enterprise manager SOA management Pack Enterprise Edition and WebLogic Server Management pack Enterprise (EE)?

A. SOA Management Pack EE is not a superset of the WebLogic Server management Pack EE.

B. SOA Management Pack EE cannot monitor the full software stack for Oracle SOA Suite, Oracle Service Bus, and Application Integration Architecture.

C. SOA Management Pack EE is a superset of WebLogic Server management pack EE.

D. SOA management Pack EE can monitor the full software stack for Oracle SOA SUITE, Oracle Service Bus, and Application Integration Architecture.

Correct Answer: AD

A, D (Not B, not C):

* SOA Management Pack Enterprise Edition

This pack supports the following Grid Control SOA targets:

Business Process Execution Language (BPEL)

Oracle Service Bus (OSB)

Oracle SOA Suite 11g Infrastructure (soa-infra)

Oracle SOA Suite 11g SOA Composites

This pack also supports the following Application Dependency and Performance (ADP) targets:

Business Process Execution Language (BPEL)

Oracle Enterprise Service Bus (OESB)

Oracle Secure Backup (OSB)

WebLogic Integration (WLI)

Oracle SOA Suite 11g SOA Composites

*

WebLogic Server Management Pack Enterprise Edition This pack offers a complete, cost-effective, and easy-to-use solution for managing Oracle Fusion Middleware, Oracle WebLogic Server, and Oracle Application Server. At a high level, this pack provides capabilities for application performance management, configuration management, service level management, coherence management as well as provisioning and patch automation for Oracle Application Server, Oracle Fusion Middleware, and/or Oracle WebLogic Server software.

Note:

*

Enterprise Manager offers the following management packs for Oracle Middleware Enterprise Management: WebLogic Server Management Pack Enterprise Edition SOA Management Pack Enterprise Edition Management Pack for WebCenter Suite Diagnostics Pack for Oracle Middleware Management Pack for Oracle Coherence
