QUESTION 1

You want to develop a BI Publisher report for all active users in the company. Identify the correct SQL statement.(Choose the best answer.)

A. upper(:p_varchar_UserID)) and (nvl(:p_varchar_EmpStatus,\\'\\')=\\'\\'or upper(usr.usr_status) = upper(:p_active))

B. B. upper(:p_varchar_UserID)) and (upper(usr.usr_status) = upper(\\'active\\'))

C. upper(:p_varchar_Org)) and (nvl(:p_varchar_EmpStatus,\\'\\')=\\'\\'or upper(usr.usr_status) = upper(:p_active))

D. D.upper(:p_varchar_Org)) and (upper(usr.usr_status) = upper(\\'active\\'))

E. upper(:p_varchar_UserID)) and (nvl(:p_varchar_Org,\\'\\')=\\'\\'or upper(usr.usr_status) = upper(:p_varchar_EmpStatus))

Correct Answer: C

QUESTION 2

How is a disconnected resource provisioned to a user? (Choose the best answer.)

A. Through requests only

B. Through direct provisioning only

C. Directly or through requests

D. Through access policies

Correct Answer: A

Reference:http://docs.oracle.com/cd/E27559_01/admin.1112/e27149/disconn_resources.ht m#OMADM4958

QUESTION 3

Which statement is true about assigning privileged accounts to end users by using Oracle Privileged Account Manager? (Choose the best answer.)

A. Privileged accounts can be directly assigned to end users but not to groups.

B. Privileged accounts can be directly assigned to groups but not to specific end users.

C. Privileged accounts can be directly assigned to end users and to groups.

D. Privileged accounts can be directly assigned to only one unique end user.

E. Privileged accounts must be directly assigned to more than one end user.

Correct Answer: C

In addition to directly assigning privileged accounts to end users, Oracle Privileged Account Manager allows you to assign privileged accounts to groups. For example, you might want to create a "Data Center Product UNIX Administrators" group and give that group access to certain privileged accounts.

When designing your deployment, it is important to ensure that a given end user is granted access to a privileged account through only one path (either directly or through a single group). When Oracle Privileged Account Manager discovers multiple grant paths, it picks the first path retrieved from its back-end, which leads to non-deterministic behavior. This behavior can cause the effective Usage Policy to be different from the intended Usage Policy. Reference:http://docs.oracle.com/cd/E37115_01/admin.1112/e27152/und_security.htm#OP MAG31226

QUESTION 4

Which statement describes how Oracle Privileged Account Manager (OPAM) provides privileged account requests? (Choose the best answer.)

A. End users can request membership in OPAM roles by using the standard request functionality in Oracle Identity Manager (OIM).

B. End users can request membership in OPAM roles by using OPAM-specific workflow templates in the Oracle Identity Manager (OIM) integration WSDL.

C. Only OPAM administrators can request OPAM roles by using the standard request functionality in Oracle Identity Manager (OIM).

D. Only OPAM administrators can request OPAM roles by using OPAM-specific workflow templates in the Oracle Identity Manager (OIM) integration WSDL.

E. End users do not need to request privileged account access because all users inherently can check out privileged account passwords.

Correct Answer: A

Reference:https://docs.oracle.com/cd/E27559_01/admin.1112/e27152/adv_config.htm#OP MAG140(7.1.5)

QUESTION 5

You have created anOperational Levelapproval policy for a request to be raised by a user on Oracle Identity Manager 11gR2. This request type is set asSelf ?Request Resourceand needs to be approved by the manager of the user who raised the request.

What two approval processes can be used for this case? (Choose two.)

A. default/RequesterManagerApproval!1.0

B. default/BeneficiaryManagerApproval!1.0

C. default/ManagerApproval!1.0

D. default/DefaultRoleApproval!1.0

E. default/DefaultApproval!1.0

Correct Answer: AE
