QUESTION 1

With which three activities does Virtual Assembly Builder help? (Choose three.)

A. maintaining flexibility for developers

B. reducing runtime errors

C. enabling full access to infrastructure

D. creating a standardized model for IT

E. automating provisioning of the entire application topology

Correct Answer: ADE

QUESTION 2

Which configuration file must a user edit to configure Oracle HTTP Server?

A. httpd.conf

B. obj.conf

C. workers.properties

D. magnus.conf

E. oraclehttp.conf

Correct Answer: A

QUESTION 3

An application frequently requests data (from s Coherence cache configured with a cache loader) that may not be available in the underlying data source. The cost of looking up data via the cache loader is expensive in terms of time and resources.

To reduce these costs, which configuration should be used to cache the notion that an entry is not available?

A. Modify the application to maintain a "misses" cache to keep track of the entries that were expected to be found in the other cache, but were recently not found.

B. Configure a "cache-miss-scheme" on the appropriate cache.

C. Modify the cache loader to maintain a "map" of entries not found, and consult this map before attempting to load an entry from the external source.

D. This can\\'t be achieved with Coherence.

Correct Answer: A

QUESTION 4

What information is needed in the process of creating a patch template for WLS Domain?

A. one or more patches to apply

B. the domain target

C. stage directory (if not already staged)

D. WLS Domain Administrator credentials, and Host credentials

E. Patch Plan

Correct Answer: D

QUESTION 5

Your application had experienced an OutOfMemoryError on one of the cache servers. You had configured the JVM to produce a heap dump when OutOfMemoryErrors occur. Your analysis of the heap dump indicates that approximately 90% of the heap is consumed by instances of com.tangosol.util.Binary.

What configuration change will reduce the number of com.tangosol.util.Binary instances?

A. Introduce a near cache for all partitioned caches.

B. Increase the size of the thread pool for all cache services.

C. Increase the expiry delay on all distributed-scheme backing maps.

D. Lower the high-unit threshold on all distributed-scheme backing maps.

Correct Answer: B
