QUESTION 1

Which statement is true about Oracle Access Manager 11g session management?

- A. Oracle Access Manager 11g uses Coherence to reliably cache millions of user sessions simultaneously.
- B. Oracle Access Manager 11g uses encrypted cookies that track the login time, authentication level, and the idle and maximum session times.
- C. Oracle Access Manager 11g session information is stored in lightweight directory access protocol (LDAP) directory.
- D. Oracle Access Manager 11g requires an Oracle database to reliably store session information.

Correct Answer: B

QUESTION 2

Which two services can be enabled from the Oracle Access Management 11gR2 console?

- A. Identity Federation
- B. Oracle Adaptive Access Manager
- C. Mobile and Social
- D. Oracle Entitlements Server
- E. Oracle API Gateway

Correct Answer: AD

QUESTION 3

You are configuring Oracle Entitlements Server (OES) and have a requirement to make a connection to an external Policy Information Point (PIP) in order to retrieve an attribute for use in a condition.

You need to modify the security module configuration to configure the PIP. Which two options do you have for making this modification?

- A. Configure the PIP settings in your OES policy and distribute it to each security module as part of the policy distribution.
- B. Manually edit the `jeops-config.xml` file on each security module.
- C. Use the OES admin console to define the PIP settings and write them to a database for each security module to retrieve during bootstrap.
- D. Use the SMConfig UI to configure the settings.

Correct Answer: BD

QUESTION 4

From Oracle Access Manager 11g R1-PS1 (and R2) onward, resource definitions in the policy model have a field protection level that can be protected, unprotected, or excluded. What is the correct behavior for a request that has the excluded protection level?

- A. Authentication is always performed but session validation is not performed.
- B. Authentication is not performed but session validation is always performed.
- C. The WebGate/agent lets the request through without authentication and no validation is performed.
- D. TheOAM_REMOTE_USERheader is added to the request.

Correct Answer: C

QUESTION 5

Which service does the Session Management Engine (SME) use internally to provide a high performance, distributed caching system, and to enable the monitoring and management of user sessions in real time?

- A. Oracle ADF
- B. Oracle Coherence
- C. WebGates
- D. Oracle Adaptive Access Manager

Correct Answer: B
