-  **800,000+** Satisfied Customers

QUESTION 1

You have to load three tables A, B, and C in parallel, wait for them to be loaded, and then load a fourth table D. Which steps do you have to go through in order to do this?

- A. Generate three scenarios to load A, B, and C, add them to a Package, set their Synchronization mode to Asynchronous, use an OdiWaitForChildSession step before adding an Interface to load D
- B. Generate three scenarios to load A, B, and C, add them to a package, set their Synchronization mode to Synchronous, use an OdiWaitForChildSession step before adding an interface to load D
- C. Add three Interfaces to load A, B, and C to a package, use an OdiWaitForChildSession step before adding another Interface to load D
- D. Generate three scenarios to load A, B, and C, add them to a package, use an OdiWaitForChildSession step before adding an Interface to load D

Correct Answer: A

QUESTION 2

In an ODI Interface, can filters be added automatically?

- A. Yes, if they were reverse-engineered-
- B. Yes, if they exist in the datastore definition.
- C. No, filters can never be added automatically.
- D. No, because each interface instance is unique and different from others.

Correct Answer: D

QUESTION 3

Is it possible to import a knowledge module into project (A) and then reference that knowledge module in another project (B)?

- A. Yes, knowledge modules can be imported.
- B. Yes, but three specific variable;; have to be declared to indicate the data environment.
- C. No, to use a knowledge module, it must be imported into each project.
- D. No, because a variable needs to be set to define it as a global knowledge module-

Correct Answer: C

Only global KMs or KMs that have already been imported into the project can be selected in the interface. Make sure that you have imported the appropriate KMs in the project before proceeding.

QUESTION 4

A step in the Package you are designing should not appear in the ODI logs. How do you implement this?

- A. Schedule periodically a scenario that uses OdiPurgeLog to remove those steps from the ODI logs
- B. In the Package Editor, click the step, go to the Advanced tab, and set Log Steps in the Journal to Never
- C. Modify the Operator Navigator settings to disable that step from being displayed
- D. Right-click the step in Package Editor and select the No Logging menu item

Correct Answer: B

QUESTION 5

In Topology, can a query be defined to retrieve native database sequences?

- A. Yes, in the technology details in the Topology submodule, there is a tab that defines queries for specific database elements.
- B. Yes, but you need to specify an option in the knowledge modules of the mapping using sequences.
- C. No, only the timestamp definition can be set in Topology.
- D. No, the query for native sequences is defined in ODI Data Models, under ODJ Studio Designer.

Correct Answer: A
