QUESTION 1

In an ODI interface, to declare a lookup, is there a dedicated graphical object?

A. No, in ODI you can declare a lookup only using a join definition.

B. No, in ODI you can declare a lookup only using an ODI procedure.

C. Yes, there is a specific object, you click it and a wizard helps the developer to set the lookup.

D. Yes, there is a specific object and you need to prepare a configuration file to use it.

Correct Answer: C

QUESTION 2

In Topology, can a query be defined to retrieve native database sequences?

A. Yes, in the technology details in the Topology submodule, there is a tab that defines queries for specific database elements.

B. Yes, but you need to specify an option in the knowledge modules of the mapping using sequences.

C. No, only the timestamp definition can be set in Topology.

D. No, the query for native sequences is defined in ODI Data Models, under ODJ Studio Designer.

Correct Answer: A

QUESTION 3

In an ODI interface, if a business rule is declared to calculate a sum aggregation, does a knowledge module need to be customized in order to create the correct code?

A. Yes, business rules and the physical implementation are strictly interlayed in ODI.

B. Yes, a customization is needed only for aggregation functions.

C. No, aggregation code is generated automatically by ODI according to the mapping logic rules.

D. No, it is not needed but, a variable must be declared in the source mapping in order to generate the correct sum.

Correct Answer: C

QUESTION 4

Select the correct statement. When running an interface in ODI, is it possible to see a simu-lation of the code?

A. No, that is a current limitation in ODI.

B. No, but it is possible to query the metadata repository in order to see the generated code.

C. Yes, but it is only possible to see a code simulation on ODI Console.

D. Yes, before executing the interface, it is possible to set a flag to request the code simulation.

Correct Answer: D
