QUESTION 1

Which module is not covered in BI Applications for EBS?

- A. Financial Analytics
- B. HR Analytics
- C. Procurement and Spend Analytics
- D. Marketing Analytics

Correct Answer: D

QUESTION 2

What is the significance of Configuration tags in Oracle DAC?

- A. It controls the inclusion of tasks in a subject area.
- B. It controls the parameters generated by DAC.
- C. It controls the OS configuration parameters required for functioning of DAC
- D. It controls the configuring of the source and target database schemas.

Correct Answer: A

QUESTION 3

Which statement is true about the safe path in SDE and SIL mappings when implementing a Type I customization?

- A. The safe path is used by all lookup data and is used to populate variables.
- B. The safe path columns in a mapping should not be duplicated or renamed.
- C. The safe path defines a path through which all extension logic should be routed and is indicated in the mapping by a placeholder column named x_custom.
- D. The safe path defines a path through which all extension logic should be routed and is indicated in the mapping by a placeholder column named x_safePath.

Correct Answer: C

QUESTION 4

After a year of working with HR and Financial Analytics, your organization chooses to add Sales Order Management Analytics. How would you combine this new module with the existing ones in the BI Applications installation?

- A. Build a new Sales Order Warehouse and ETL rules to source it. Then import its metadata into DAC and model as new physical layer in the BI repository. Test your work in Answers.
- B. Install Oracle BI Applications Sales Order Management and create the extra objects in the existing warehouse. Perform a table scan from DAC and check connection pools in the BI repository. Test your work in Answers and Dashboards.
- C. Make a backup of your ETL, the Warehouse, BI Presentation Catalog and BI Repository. Install Oracle BI Applications Sales Order Management and have the extra objects created by a script in the existing warehouse and Informatica Repository. Seed the DAC repository with new metadata, test new Out-of-the-Box execution plans, merge the newly installed BI repository with the backup and do the same with the presentation catalogs. Enable logging and test your work in Answers and Dashboards.
- D. Make a backup of the BI Presentation Catalog and BI Repository. Run the installation for Oracle BI Applications Sales Order Management. Merge all new objects with your back-up materials. Enable logging and test your results in Answers.
- E. Build a new Sales Order Warehouse and ETL rules to source it. Then import its metadata into DAC and build new execution plans based on the new Warehouse objects. Enable the BI repository with Sales Order metadata and cross-analysis and test your work in Answers.
- F. Install Oracle BI Applications Sales Order Management. After the installation check the connection pools in the BI repository. Test your work in Answers and Dashboards.

Correct Answer: C

QUESTION 5

In an Oracle BI Cluster Server environment which statement is true?

- A. BI Scheduler can reside outside Local Area Network (LAN) whereas the other components (Clustered BI Servers, Master BI Server, BI Cluster Manager) of Oracle BI Cluster Server must reside on the same LAN.
- B. Clustered BI Servers, Master BI Server, BI Scheduler and Cluster Manager all need to reside in one Local Area Network (LAN).
- C. Cluster Manager can reside outside Local Area Network (LAN) whereas the other components (Clustered BI Servers, Master BI Server, BI Scheduler) of Oracle BI Cluster Server must reside on the same LAN.
- D. All components of an Oracle BI Cluster Server environment may exist on different Local Area Networks (LANs), provided the LAN are connected through a single Wide Area Network (WAN).

Correct Answer: A
