#### QUESTION 5

Your application contains a bounded task flow with four pages. The pages are all based on different application modules and the task flow has the transaction property set to "Always Begin New Transaction and a commit operation is defined as the return activity. The user makes some changes on each of the pages but a commit failure occurs on the bindings in the third page. Which of these scenarios describes the outcome of this situation?

- A. None of the changes on any of the pages is committed all are rolled back.
- B. Pages one and two and four are committed; page three is not committed.
- C. The changes on the first two pages are committed; the changes on the last two pages are not committed.
- D. It depends on the value that has been set in the Transaction property on each application module.

Correct Answer: C
