### QUESTION 1

You are about to enable maintenance mode on the Desktop Provider storage servers. Which statement correctly describes the desktop state at this point?

- A. The desktops hosted on the storage are migrated to storage attached to a different Desktop Provider.
- B. All new desktop clones for that Desktop Provider are rerouted to other Desktop Providers.
- C. The storage is disabled and the desktops are either suspended or shutdown. The desktops are unavailable until the server is re-enabled.
- D. Any new access to any Desktop Provider within Oracle VDI is suspended until the maintenance mode is completed and the servers are re-enabled.

Correct Answer: C

Reference: [http://docs.oracle.com/html/E26214\\_02/maintenance-mode.html](http://docs.oracle.com/html/E26214_02/maintenance-mode.html) (see 8.6.2)

---

### QUESTION 2

Your users are complaining that their Sun Ray clients are no longer connecting to their Oracle VDI session. The users state that there is an hour glass on the screen and the OSD icon is showing the number 21. Which condition will cause this OSD code to appear?

- A. When the Sun Ray client is downloading new firmware
- B. When the VPN connection is attempting to connect or reconnect
- C. When DHCP services are not responding
- D. When there is no access to the VirtualBox VMs

Correct Answer: C

Reference: <http://docs.oracle.com/cd/E19481-01/819-2389/t-s.html> (see 21)

---

### QUESTION 3

Users cannot log in to their desktops and after investigation it seems to have started right after the primary LDAP server went offline. What settings need to be the same on the primary LDAP server and backup LDAP server so that VDI will continue to operate?

- A. The same security level, TCP port, base DN, and credentials
- B. The same hostname, LDAP server, MAC address, and base DN
- C. The same DNS name, base DN, SSL certificates, and version of LDAP
- D. The same root password, base DN, SSL certificates, and forest configuration

Correct Answer: D

---

#### QUESTION 4

- A. Session-based providers allow access to desktop virtual machines hosted on VMwareESXserveronly.
- B. Session-based providers supply access to desktop sessions hostedby remote computers such asMicrosoftRemote Desktop Services.
- C. Session-based providers supply access to desktop virtual machines hosted by bare metalhypervisorssuch as VMware ESX server, or a hosted hypervisor such as Oracle VM VirtualBox.
- D. Session-based providers allow access to desktop virtual machines hosted on Oracle VM VirtualBox as well as MicrosoftRemote Desktop Services desktop sessions.

Correct Answer: D

Reference:[http://docs.oracle.com/cd/E36500\\_01/E36504/html/desktops-and-providers.html](http://docs.oracle.com/cd/E36500_01/E36504/html/desktops-and-providers.html)(see 2.3.1.2)

---

#### QUESTION 5

After setting up the user directory on your Oracle VDI center, you are told that the security level needs to be changed. If you have already chosen the connection type, is it still possible to change the security level?

- A. Yes, you can change the sosecuritylevel, but onlyif you have defined additional fallback hosts.
- B. Yes, it is possible to change the security level, but only if additional Fallback hosts have not yetbeen defined.
- C. Yes,it is possible to change the security level, but only if you are using AD.
- D. No,itis notpossible tochangethe securitylevels in either LDAP or Active Directory.

Correct Answer: C
