QUESTION 1

The WebLogic service migration allows you to migrate which three different services?

A. JMS-related services

B. cluster recovery service

C. JTA transaction recovery service

D. session recovery service

E. user-defined singleton services

Correct Answer: ACE

Reference: http://docs.oracle.com/cd/E13222_01/wls/docs92/cluster/migration.html (Migration Terminology)

QUESTION 2

Looking at the front of a full rack Exalogic X2-2 machine, how many InfiniBand switch gateway rack slots would you find populated? (Choose one)

A. 8

B. 4

C. 6

D. 2

Correct Answer: B

Looking at the front of a full rack Exalogic X2-2 machine, you would see 4 populated InfiniBand switch gateway rack slots?

QUESTION 3

On Oracle Solaris, which command is used to create a virtual IPoIB interface?

A. dladm create – vnic – 1

B. ipadm createvnic – 1

C. dladm create – part – 1 - P

D. ipadm create – vnic – 1 - P

Correct Answer: C

Configure IPoIB on Solaris 10 branded zone Login to the global zone as root user and run the following commands

Example: #dladm create-part -P ffff -l ibp0 s10zone0_bond0_0

QUESTION 4

SDP sits atop the InfiniBand core in the Exalogic architecture. What is SDP? (choose one)

A. Sockets Direct Protocol

B. Service Data Point

C. Secure Delivery Platform

D. Session Description Protocol

Correct Answer: A

SDP is Sockets Direct Protocol.

QUESTION 5

Which two software components are central to providing the performance benefits delivered by an Exalogic machine?

A. WebLogic Server

B. Coherence

C. SOA Suite

D. Oracle Database

E. Oracle VM

Correct Answer: AB

Coherence provides replicated and distributed (partitioned) data management and caching services on top of a reliable, highly scalable peer-to-peer clustering protocol. Coherence has no single points of failure; it automatically and transparently fails over and redistributes its clustered data management services when a server becomes inoperative or is disconnected from the network. When a new server is added, or when a failed server is restarted, it automatically joins the cluster and Coherence fails back services to it, transparently redistributing the cluster load. Coherence includes network-level fault tolerance features and transparent soft re-start capability to enable servers to self-heal.
