QUESTION 1

Which two statements are correct about ILOM ?

A. It cannot manage an Exalogic compute node when the compute node is powered off.

B. It can manage a compute node without consuming system resources.

C. It can power the system on or off, either locally or remotely.

D. It can launch Oracle Enterprise Manager Ops Center to monitor the Exalogic machine hardware

Correct Answer: BC

QUESTION 2

Which two statements are true about Node Manager?

A. One node manager per domain

B. Node manager must start in Exalogic with xinetd deamon

C. Not needed node manager instance for control de lifecycle life of managed server, because Exalogic support the needed for elastic grown of domains.

Correct Answer: BC

C: Although Node Manager is optional, it is recommended if your WebLogic Server environment hosts applications with high availability requirements.

Not A: A Node Manager process is not associated with a specific WebLogic domain but with a machine. You can use the same Node Manager process to control server instances in any WebLogic Server domain, as long as the server instances reside on the same machine as the Node Manager process.

QUESTION 3

Select the location where server transaction logs should be stored in an Exalogic machine.

A. local storage on one of the compute nodes hosting managed server in the Weblogic cluster

B. local storage on all of the compute nodes hosting managed servers In the WebLogic cluster

C. a location on the shared storage appliance that is accessible to compute nodes hosting all managed servers in the WebLogic cluster

D. a location on the shared storage appliance that is accessible to at least one of the compute nodes hosting managed servers in the WebLogic cluster

Correct Answer: D

QUESTION 4

In an Exalogic machine, which network interface is used by applications running on compute nodes to communicate with applications running on other compute nodes?

A. BOND0

B. BOND1

C. NET0

D. ETH0

Correct Answer: A
