Following Questions and Answers are all new published by Oracle Official Exam Center

QUESTION 1

Which two are true of an NFS repository when used with Oracle VM?

A. NFS repositories are excellent for storing guests\\' root file systems.

B. NFS is a more expensive option than iSCSI or SAN fabrics.

C. OCFS2 must be used as the filesystem format for volumes exposed through NFS.

D. NFS shares mounted directly in a guest require the DM-NFS driver to be installed on the guest.

E. NFS is supported for use in RAC only when mounted from the guest (not domO).

Correct Answer: AB

Explanation:

First of all here you have to select two options but answer shows one. A is ok. A performance comparison

of NFS and iSCSI for IP-Networked Storage showed that iSCSI is faster than NFS because iSCSI caches

and updates meta-data asynchronously and transfers blocks rather than files. So the options B is right.

QUESTION 2

When converting hardware virtualized machine to full PV, the guest falls to boot. What line in vm.cfq is likely leftover from the HVM configuration?

A. vnclisten = \\'0.0.0.0\\'

B. pae =1

C. builder=\\'hvm\\'

D. serial=\\'pty\\'

Correct Answer: C

Explanation:

My suggestion is to use builder=\\'hvm\\' because it works fine for once I have failed to booting the server but when I made it builder=\\'hvm\\' it booted fine. Another thing is if you use linux os as a mother os then you can leftover this builder=\\'hvm\\' but if you use windows2003 then you have to use builder=\\'hvm\\'.

QUESTION 3

What two steps would best harden an Oracle VM Server installation?

A. Avoid installing additional software in dom0.

B. Enable firewalling in dom0.

C. Install virus checking software in dom0.

D. Use Trusted Computing Modules for Xen0.

E. Do not share physical network cards between hosts that are on a different subnet.

Correct Answer: AE

QUESTION 4

A RedHat Enterprise Linux installation with three installation CDs needs to be created. What is the proper way to set up the ISO images?

A. The ISO images should each be placed in their own subdirectory under/OVS/iso_pool.

B. The ISO images should be joined into one larger ISO image using the M75cat command, then placed under a subdirectory of/OVS/iso_pool.

C. The ISO images should all be placed under/OVS/iso_pool, using distinct names to differentiate them.

D. The ISO images should be placed in one subdirectory under/OVS/seed_pool, named according to the vendor and distribution name.

E. The ISO images should be placed in one subdirectory under/OVS/iso_pool, named according to the vendor and distribution name.

Correct Answer: A

QUESTION 5

In a paravirtualized environment, which answer best describes the drivers that are used in domO and the guest to communicate network I/O requests?

A. A netback driver is used in dom0, and a netfront driver is used in the guest.

B. A native device driver is used in dom0, and a netback driver is used in the guest.

C. A netfront driver is used in dom0, and a native device driver is used in the guest.

D. A netfront driver is used in dom0, and a blkbck driver is used in the guest.

E. Native drivers are used in both dom0 and the guest.

Correct Answer: A
