QUESTION 1

George used to Create Page Wizard to create a calendar on the DEMO_ORDERS table based on the ORDER_TIMESTAMP column. However, the calendar shows only the month and list views.

What does George need to do to show week and day views?

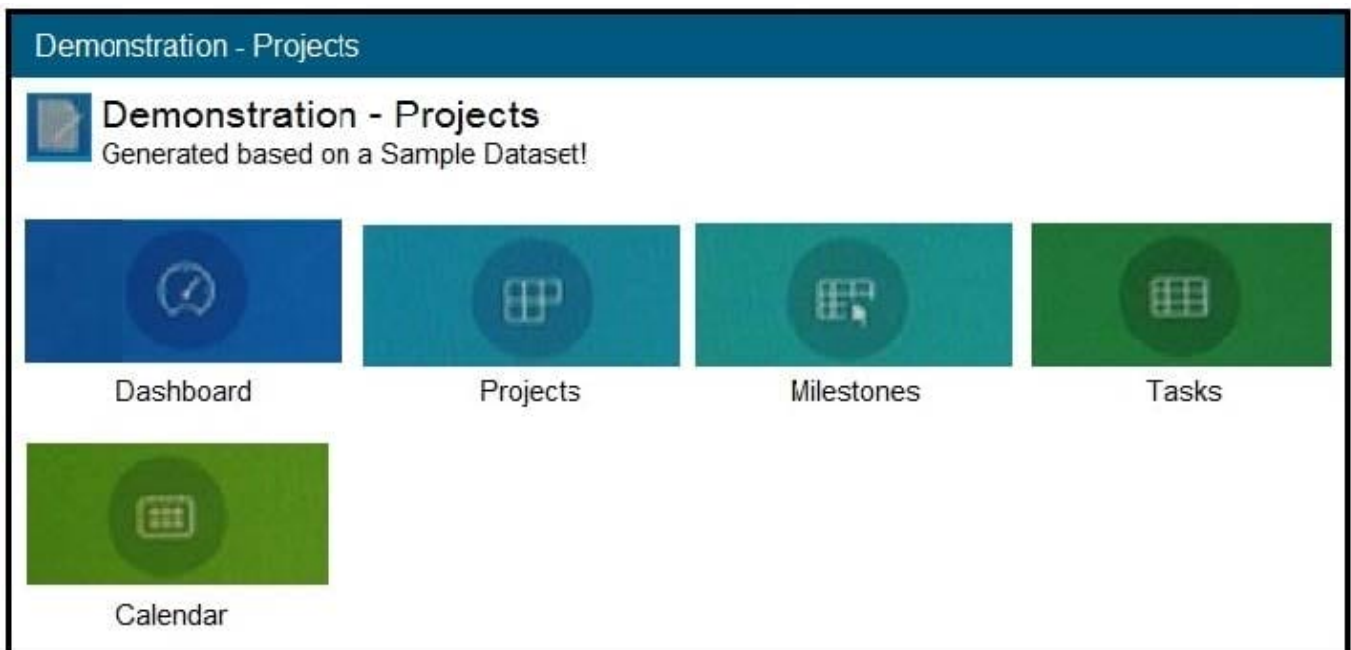

- A. Select the End Date Column
- B. Set Show Time to "Yes"
- C. Set Maximum Events / Day to greater than 1
- D. Select Week and Day under Calendar Views and Navigation

Correct Answer: A

QUESTION 3

Mark has created a modal form page to enter new calendar events. Mark now wants to call the form when an end user clicks an empty calendar spot.

How can Mark update the calendar region to call the form?

- A. Define a dynamic action of type Click in the calendar region.
- B. Use the create link attribute and the andAPEX\$NEW_START_DATE. placeholder.
- C. In the rendering tree, right-click the calendar region and select the Link Form to Calendar option.
- D. Use the create link attribute and use the :APEX\$NEW_START_DATE bind variable.
- E. Use the view/edit link attribute to display the selected calendar entry.

Correct Answer: E

QUESTION 4

Robert has a form page, Page 5, on the EMP table. He has defined two validations.

1.

Validation 1 checks that P5_MGR is not null.

2.

Validation 2 checks that the employee selected in P5_MGR has a job of PRESIDENT or MANAGER.

How can Robert prevent the employee job validation (Validation 2) from firing when the P5_MGR is NOT NULL validation (Validation 1) has failed?

- A. Set stop processing to Yes for the P5_MGR is NOT NULL validation (Validation 1)
- B. Ensure Validation 1 is listed before Validation 2
- C. Add a server-side condition of P5_MGR is NOT NULL to the employee job validation (Validation 2)
- D. Set Always Execute to No for the P5_MGR employee job validation (Validation 2)

Correct Answer: C

QUESTION 5

As a project manager, you use spreadsheets to keep track of multiple projects. As you took responsibility of more projects, you became tired of managing them in spreadsheets.

You have collated all of your project data in one single spreadsheet. You also want to maintain the data in an Oracle Database table by using an Oracle APEX application.

Which two actions can you take? (Choose two.)

- A. Define a Data Loading page in the Create Application Wizard.
- B. Use SQL Workshop > Utilities > Data Workshop to load the data into a new table, and then use the Create Application Wizard to create an application on the new table.
- C. Create an application by using the Create Application Wizard, and then add a table for the spreadsheet data.
- D. Use the Create Application Wizard and select "From a Spreadsheet."
- E. Create a new table by using SQL Workshop > Object Browser > Create Table, and then use the Create Application Wizard to create an application based on the new table.

Correct Answer: AC
