QUESTION 1

A successful web application is used by over two hundred thousand users. Due to this substantial load, the database is over bridged and fails frequently. All data, included critical user records and temporary session data, is stored in the database. Because of resource constraints, a new database system cannot be installed.

Which change will reduce the load on the database?

A. Creating more entity beans to optimize interaction wild the database

B. Refactoring the web application to use DAOs to communicate with the database

C. Refactoring the web application to store temporary session data on the web servers

D. Adding more web servers to the web tier to distribute the load and reduce the number of transactions on the database.

Correct Answer: C

100% Real QandAs | 100% Real Pass

QUESTION 2

Which three statements are true about inheritance?

A. Inheritance helps to reuse existing code implementations.

B. It should be possible to substitute the derived class for its base class.

C. Inheritance allows you to modify the behavior of objects.

D. Inheritance promotes encapsulation better than interfaces.

E. The derived class must override all methods of the base class.

Correct Answer: ABC

QUESTION 3

You are using an open source integration framework in your project. However, key interfaces do not explicitly define several strange conditions you have repeatedly seen while testing.

Which option is the name given to the anti pattern described above?

A. Composite View

B. Leaky Abstraction

C. Asynchronous Interaction

D. Golden Hammer

Correct Answer: B

QUESTION 4

A company must honor a service-level agreement (SLA) for its application, which states all database requests must execute within three seconds.

100% Real QandAs | 100% Real Pass

Users complain that some requests take longer than five seconds to complete. You have been contracted to fix the problem.

Which course of action do you recommend?

A. Modify the program to implement multi threading and an event-driven design.

B. Add servers to distribute the load.

C. Upgrade the application server and the operating system.

D. Define a plan for isolating the bottleneck, and define indicators that will measure performance under a test load.

Correct Answer: D

QUESTION 5

You are the architect at ACME, a large a large global retailer of festival and holiday accessories. ACME wants to launch a new shopping portal for the holiday shopping session, allowing two months from project inception to going live. The portal must contain in-house and third-party stock to attack customers.

Fast response times are also critical so users remain engaged and sticky to the portal.

What would you recommend to the ACME project team to deliver this project?

A. Access all third party content using JSONP to dynamically load it from the browser.

B. Access as much content with bulk-loading as possible; use JSONP to access the remainder.

C. Access all content regardless of source using the HTML 5 XML parsing capabilities of the browser

D. Access all third party content using JSON to dynamically load it from the browser.

Correct Answer: A
