### QUESTION 1

Given the code fragment:

```
//line n1  
Double d = str.average().getAsDouble();  
System.out.println("Average = " + d);
```

Which should be inserted into the line n1 to print Average = 2.5?

- A. Stream str = Stream.of(1, 2, 3, 4);
- B. IntStream str = IntStream.of(1, 2, 3, 4);
- C. DoubleStream str = Stream.of(1.0, 2.0, 3.0, 4.0);
- D. IntStream str = Stream.of(1, 2, 3, 4)

Correct Answer: B

Use IntStream.

Reference: <https://docs.oracle.com/javase/8/docs/api/java/util/stream/IntStream.html>

---

### QUESTION 2

Given the code fragments:

```
class R implements Runnable {  
    public void run() { System.out.println("Run..."); }  
}  
  
class C implements Callable<String> {  
    public String call() throws Exception { return "Call..."; }  
}
```

and

```
ExecutorService es = Executors.newSingleThreadExecutor();  
es.execute(new R()); // line n1  
Future<String> fl = es.submit(new C()); // line n2  
System.out.println(fl.get());  
es.shutdown();
```

What is the result?

- A. A compilation error occurs at line n2.
- B. The program prints Run... and throws an exception.
- C. Run... Call...
- D. A compilation errors occurs at line n1.

Correct Answer: A

### QUESTION 3

Given the code fragment:

```
final List<String> list = new CopyOnWriteArrayList<>();
final AtomicInteger ai = new AtomicInteger(0);
final CyclicBarrier barrier = new CyclicBarrier(2, new Runnable() {
    public void run() { System.out.println(list); }
});
Runnable r = new Runnable() {
    public void run() {
        try {
            Thread.sleep(1000 * ai.incrementAndGet());
            list.add("X");
            barrier.await();
        } catch (Exception ex) {
        }
    }
};
new Thread(r).start();
new Thread(r).start();
new Thread(r).start();
new Thread(r).start();
```

What is the result?

- A. [x, x] [x, x, x, x]
- B. [x] [x, x] [x, x, x]
- C. [x] [x, x] [x, x, x] [x, x, x, x]
- D. [x, x]

Correct Answer: A

### QUESTION 4

Given: and the code fragment:

```
class Person {
    private String firstName;
    private int salary;
    public Person(String fN, int sal) {
        this.firstName = fN;
        this.salary = sal;
    }
    public int getSalary() { return salary; }
    public String getFirstName() {return firstName; }
}
```

```
List<Person> prog = Arrays.asList(
    new Person("Smith", 1500),
    new Person("John", 2000),
    new Person("Joe", 1000));
double dVal = prog.stream()
    .filter(s -> s.getFirstName().startsWith("J"))
    .mapToInt(Person::getSalary)
    .average()
    .getAsDouble();
System.out.print(dVal);
```

What is the result?

- A. A compilation error occurs.
- B. 2000.0
- C. 1500.0
- D. 0.0

Correct Answer: A

The line `mapToInt(Person::GetSalary)` will cause a compile error.

If it is replaced by the following line, a "." is added in the beginning of the line, the result would be 1500.0:

```
.mapToInt(Person::getSalary)
```

## QUESTION 5

Given the code fragment:

```
public void processFile() throws IOException, ClassNotFoundException {
    try (FileReader fr = new FileReader("logfilesrc.txt");
        FileWriter fw = new FileWriter("logfiledest.txt")) {
        Class c = Class.forName("java.lang.JString");
    }
}
```

If exceptions occur when closing the FileWriter object and when retrieving the JString class object, which exception object is propagated up to the caller of the processFile method?

- A. java.lang.Exception
- B. java.io.IOException
- C. java.lang.ClassNotFoundException
- D. java.lang.NoSuchClassException

Correct Answer: C

ClassNotFoundException is thrown when an application tries to load in a class through its string name using:

\*

The forName method in class Class.

\*

The findSystemClass method in class ClassLoader .

\*

The loadClass method in class ClassLoader.

but no definition for the class with the specified name could be found.

References: <https://docs.oracle.com/javase/7/docs/api/java/lang/ClassNotFoundException.html>
