QUESTION 1

Your company wants to incorporate a legacy script that runs once during the boot cycle as an SMF service. What appropriate setting for the duration attribute in the startd property group for this service?

A. transient

B. contract

C. wait

D. boot

Correct Answer: B

QUESTION 2

You created a role. The role should be able to change the configuration of a zone. How will you assign that privilege to the role?

A. Modify the zone using the admin resource, set the user property to the role and the auths property to manage.

B. Assign to the role the zone Management Rights Profile.

C. Assign to the role the solaris.zones.* authorization.

D. Assign to the role the zone Security Rights Profile.

Correct Answer: B

QUESTION 3

Your server has a package repository that local clients access remotely. Which option manages HTTP access to the repository?

A. pkg set-property

B. pkg.depotd

C. pkg.repotd

D. pkgrepo

Correct Answer: D

QUESTION 4

You have a server that has two zones configured. These zones use the pool named pool_zones. Examine the following configuration information:

```
root@sol11-server:~# poolcfg -c info

...
        pool pool_zones
                int             pool.sys_id 1
                boolean         pool.active true
                boolean         pool.default false
                string pool.scheduler FSS
                int             pool.importance 1
                string pool.comment
                pset            pset_zones
...
        pset pset_zones
                int             pset.sys_id 1
                boolean         pset.default false
                uint            pset.min 2
                uint            pset.max 2
                string pset.units population
                uint            pset.load 0
                uint            pset.size 0
                string pset.comment
...
root@sol11-server:~# prctl -n zone.cpu-shares -i zone z1
zone: 5: z1
NAME     PRIVILEGE        VALUE      FLAG     ACTION                RECIPIENT
zone.cpu-shares
        usage            40
        privileged       40           -      none                     -
        system           65.5K       max     none
```

The system has four CPUs. Assume that both zones are under heavy load. Examine the following partial output:

```
root@sol11-server:~# prstat -Z
...

ZONEID NPROC   SWAP   RSS    MEMORY  TIME CPU  ZONE
0       109    2583M  742M   16%     0:17:42  2.5% global
5       16     94M    961M   22.2%   0:01:15  xxx% z1
4       29     126M   865M   41.9%   0:00:27  xxx% z2
```

Which option describes the values you would expect to see for the CPU field for the zones?

A. approximately 40% for z1 and approximately 60% for z2

B. approximately 60% for z1 and approximately 40% for z2

C. approximately 20% for z1 and approximately 30% for z2

D. approximately 30% for z1 and approximately 20% for z2

E. approximately 25% for z1 and approximately 25% for z2

Correct Answer: A

QUESTION 5

The following command is issued: pkg set-publisher P publisher2

What is the impact on your system?

A. makes the specified publisher sticky

B. makes the specified publisher the highest-ranked publisher

C. displays information about the specified publisher

D. moves the specified publisher one step higher in the search order

Correct Answer: B
