### QUESTION 1

You are the administrator of on Oracle Solaris 11 AI server. You added a client. Then you created a custom manifest, custom criteria, and a custom profile for the client. You made an error in the package path within the custom manifest. When will the error appear?

- A. when the manifest is checked during client preinstall
- B. when the manifest is used during client install
- C. when the manifest is updated on the AI server
- D. when the manifest is added to the AI server

Correct Answer: D

### QUESTION 2

Examine the following information:

```
root@sol11-server:~# auditconfig -getflags
active user default audit flags = lo(0x1000,0x1000)
configured user default audit flags = lo(0x1000,0x1000)

root@sol11-server:~# getent user_attr auuser
auuser:::type=normal;profiles=System Administrator, System Admin
Audit;audit_flags=ss\:no

root@sol11-server:~# profiles -p "System Admin Audit" info
Found profile in files repository.
name=System Admin Audit
desc=audit flags profile
always_audit=am,+ss
never_audit=-ss
```

Which statement describes the user auuser audit mask?

- A. All failed and successful lo events, all failed and successful am events will be logged, no ss events will be logged.
- B. All failed and successful lo events, all failed and successful am events and successful ss events will be logged.
- C. All failed and successful lo events, all failed and successful am events and failed ss events will be logged.
- D. All failed and successful lo events and all failed and successful ss events will be logged.

Correct Answer: A

### QUESTION 3

Which is the result of the following command?

```
# zfs send i dpool/sales/qrreports@qtrreport dpool/sales/qrreports@nth3qtrreport
```

- A. An error message will be sent to standard error.
- B. The dpool/sales/qrreports@qtrreport snapshot is saved to disk.
- C. The dpool/sales/qrreports@mth3qtrreport snapshot is saved to disk
- D. The difference between the First snapshot and the second snapshot will be written to disk

Correct Answer: A

#### QUESTION 4

You decide to create a new rights profile to include a selection of Solaris authorizations and commands. The commands in your selection will require extra privileges. Which two files will you modify to add these privileges and authorizations?

- A. /etc/user\_attr
- B. /etc/security/auth\_attr
- C. /etc/security/prof\_attr
- D. /etc/security/exec\_attr
- E. /etc/security/prof\_attr.d/core-os
- F. /etc/security/auth\_attr.d/core-os

Correct Answer: AC

#### QUESTION 5

Your company's security policy prohibits access to the Internet. You already installed an instance of Oracle Solaris 11 on an M-series server for base testing. You used the text install media to install the system. You also installed a package repository on the same system. There are 10 M-series servers that have just been installed on the local network. Can you immediately install an AI server on your testing machine order to install Oracle Solaris 11 on these 10 servers?

- A. Yes, by using the existing Solaris 10 Jumpstart server.
- B. Yes, by using the text install media for the AI software.
- C. Yes, by using the Installed package repository.
- D. No, you must download the AI .iso image from Oracle first.
- E. No, the Solaris large-server group must be installed because it contains the AI setup tools.
- F. No, the Solaris 11 full n repository must be installed on the AI server.
- G. No, you must have a prebuilt image that was created by the distribution constructor.

Correct Answer: B
