### QUESTION 1

Which is true about the installation status report definition?

- A. A MIDlet suite CANNOT be removed until the installation notification has been successfully sent and the acknowledgement has been received.
- B. In response to an installation status report, the server must reply with a 200 OK. HTTP acknowledgement response.
- C. If the installation status report CANNOT be sent, the device must refuse the installation of the MIDlet suite.
- D. The only protocols supported for the status report notification are HTTP and UDP.

Correct Answer: B

---

### QUESTION 2

Which two are true regarding error handling for classes that exist in both CLDC and J2SE? (Choose two.)

- A. The set of error classes is essentially the same in CLDC and J2SE.
- B. The set of error classes is much reduced in CLDC to help reduce the overhead of the JVM.
- C. If a class throws an error in CLDC, it should throw the same error as in J2SE or its nearest superclass.
- D. There is no correspondence between the errors defined by CLDC and J2SE because the needs of CLDC and J2SE are so different.

Correct Answer: BC

---

### QUESTION 3

Click the Task button.

Place the appropriate platform label on the class name. If the class exists in both CLDC and J2SE, choose the "Exists in BOTH..." option, regardless of whether the package names are different.

Select and Place:

Place the appropriate platform label on the class name.

If the class exists in both CLDC and J2SE, choose the "Exists in BOTH..." option, regardless of whether the package names are different.

Class	Platform
StreamConnection	Exists ONLY in CLDC
BufferedOutputStream	Exists ONLY in J2SE
ThreadGroup	Exists in BOTH CLDC and J2SE
Thread	
ArrayList	
Stack	
Calendar	

Correct Answer:

Place the appropriate platform label on the class name.

If the class exists in both CLDC and J2SE, choose the "Exists in BOTH..." option, regardless of whether the package names are different.

Class	Platform
Exists ONLY in J2SE	Exists ONLY in CLDC
Exists ONLY in CLDC	Exists ONLY in J2SE
Exists ONLY in CLDC	Exists in BOTH CLDC and J2SE
Exists in BOTH CLDC and J2SE	
Exists ONLY in CLDC	
Exists in BOTH CLDC and J2SE	
Exists in BOTH CLDC and J2SE	

#### QUESTION 4

Which two methods are available only within classes of the MIDP low-level UI API? (Choose two.)

- A. setFullScreenMode()
- B. hasRepeatEvents()
- C. setPreferredSize()
- D. notifyStateChanged()
- E. getLayout()

Correct Answer: AB

---

#### QUESTION 5

Which guarantees the application can be installed without push registration conflicts?

- A. It is NOT the responsibility of the MIDlet to resolve these conflicts. The installer does this automatically.
- B. The MIDlet specifies the push registration in the JAD, but will register dynamically if there is a conflict.
- C. The MIDlet tries to register the connection dynamically after installation.
- D. The MIDlet specifies multiple push registration strings in the JAD.

Correct Answer: C
