### QUESTION 1

Another user has issued the statement LOCK TABLE pets FOR WRITE You can...

- A. Update table pets
- B. SELECT from table pets
- C. UPDATE and SELECT from table pets
- D. None of the above

Correct Answer: D

28.2. Explicit Table Locking When a table is locked for reading, other clients can read from the table at the same time, but no client can write to it. Once acquired, only the client holding the write lock can read from or write to the table. Other clients can neither read from nor write to it. No other client can lock the table for either reading or writing.

---

### QUESTION 2

Which one of the following statements can be used to start MySQL 5.0 manually from the command line on windows?

- A. C:\> C:\Program Files\MySQL\MySQL Server 5.0\bin\mysqladmin -u root start
- B. C:\> C:\Program Files\MySQL\MySQL Server 5.0\bin\mysqld
- C. C:\> C:\Program Files\MySQL\MySQL Server 5.0\bin\mysql\_start

Correct Answer: B

---

### QUESTION 3

Which of the following is true of a MySQL client and server?

- A. They must be run on the same type of Operating System.
- B. They must be run on the same hardware architecture.
- C. They do not have to be run on the same type of Operating System.
- D. They do not have to be run on the same hardware architecture.

Correct Answer: CD

---

### QUESTION 4

When running the MySQL server under Windows, the --console option is used to display server errors in the console window.

- A. True
- B. False

Correct Answer: A

#### 24.2.2. Running MySQL Server Manually on Windows

If the server does not start properly, check the error log in the data directory to see why. Alternatively, to display diagnostic output in the console window instead, invoke the server with the --console option.

---

#### QUESTION 5

Which of the following correctly describes the differences between explicitly and implicitly set locks?

- A. Implicitly set locks are locks set and released on behalf of the client, by the server.
- B. Explicitly set locks are locks set and released on behalf of the client, by the server.
- C. Implicitly set locks are locks acquired and released by the client.
- D. Explicitly set locks are locks acquired and released by the client.

Correct Answer: AD

#### 28.1. Locking Concepts

For a client that does nothing special to acquire locks, the MySQL server implicitly acquires locks as necessary to process the client's statements safely.

If implicit locking is insufficient for a client's purposes, it can manage locks explicitly by acquiring them with LOCK TABLES and releasing them with UNLOCK TABLES. Explicit locking may be necessary when a client needs to perform an

operation that spans multiple statements and that must not be interrupted by other clients.
