### QUESTION 1

Which of the following optimizations could be made based on data collected in the slow query log?

- A. Tune server parameters.
- B. Change the storage engines in use.
- C. Make changes to the network infrastructure.
- D. Rewrite queries to perform more efficiently.
- E. Normalize data or add indexes to the tables that the queries use.

Correct Answer: C

---

### QUESTION 2

What type of resource limitations may be placed on a user account with the GRANT statement?

- A. The number of times per hour that an account is allowed to connect to the server
- B. The number of queries per hour an account is allowed to issue
- C. The number of updates per hour an account is allowed to issue
- D. The maximum number of simultaneous connections an account can have
- E. Resource limits can only be specified globally, not per-account
- F. MySQL does not have provisions for limiting resource usage

Correct Answer: F

---

### QUESTION 3

Which of the following are requirements for running more than one MySQL server on the same machine?

- A. On Windows each server that runs as a service must have a different service name.
- B. Each server must have its own log files.
- C. Each server must share the same error log.
- D. Each server must run on a different disk.
- E. Each server must have its own network interfaces.
- F. There must be more than one processor on the machine.
- G. InnoDB tablespace files must be separate between servers.

Correct Answer: D

---

#### QUESTION 4

Consider the following:

```
+---+-----+-----+
| id | PartName | Location |
+---+-----+-----+
| 1 | 40GB Hard Drive | Jacksonville |
| 2 | 1GB DDR | Atlanta |
| 3 | Keyboard | San Jose |
| 4 | Monitor | Harrisburg |
| 5 | USB Drive | Miami |
| 6 | DVD/R | Jacksonville |
+---+-----+-----+
```

Which of the following best describes why this table should be split into a part and location table?

- A. Because it has redundant location values.
- B. Because it has multiple repeating groups in each row.
- C. This table should not be split as it is already in third normal form.

Correct Answer: A

---

#### QUESTION 5

Why should you be selective when granting the PROCESS privilege to an account?

- A. Because it allows the client to control running processes on the server.
- B. Because it allows the client to process scripts.
- C. Because it allows for the use of the SHOW PROCESSLIST command, which can expose data.
- D. Because it allows for the use of stored routines.

Correct Answer: C
